RIGHTS ISSUE OF SHARES

October 02, 2019

Dear Shareholder(s),

We are pleased to inform you that, the honorable shareholders of the Company in the 14th Annual General Meeting held on December 19, 2018 approved rights issuance of 119,909,790 Ordinary Shares of Tk. 10.00 each at par totaling Tk. 1,199,097,900.00 at 1 (One): 1 (One) [R] ratio i.e. 1(One) Rights share for 1(One) existing share held on the record date for entitlement. Later the Board of Directors in its board meeting held on April 7, 2019 recommended to revise the right offer for issuance of 89,932,342 ordinary shares at par totaling Tk. 899,323,420.00 at 4 (Four): 3 (Three) [R] ratio i.e. 3 (Three) Rights share for every 4 (Four) existing shares held on the record date which has been approved in the 7th extra ordinary general meeting (EGM) held on May 26, 2019.

The purpose of issuance of Rights Shares is expansion of existing production and distribution channels and pay off bank loans of the Company.

Having satisfactory operation, total comprehensive income of the Company is Tk. 70,208,466.00 for the period ended on September 30, 2018. The success couldn't have been possible with the support of our customers and efficient direction of the Board of Directors as well as patronization and active participation of our valued shareholders.

To maintain the growth and to increase the capital base of your Company, we hope you would come forward with full support and assistance to make the offer a success.

A self-explanatory Rights Share Offer Document prepared in the light of the Securities and Exchange Commission (Rights Issue) Rules, 2006 of the Securities and Exchange Commission is enclosed for your kind information and evaluation.

On behalf of the Board of Directors,

SD/-

Ahmed Rajeeb Samdani
Managing Director

Corporate Status and Background

Golden Harvest Agro Industries Ltd. was incorporated in Bangladesh as a private limited company on August 10, 2004 and subsequently converted into public limited company on June 30, 2010 the registered office of the company is located at Bokran, Monipur, Bobanipur, Gazipur Sadar, Gazipur. GHAIL become a listed company since March 04, 2013.

Nature of Business

Golden Harvest is one of the earliest entrants in market and become a market leader in Bangladesh with its several projects through mega expansion plan. The major projects of the company and its subsidiaries are Dry Food Products, Frozen Ready to Eat Meals, Ice Cream, Fresh Milk etc. GHAIL diversification strategy led it to invest in subsidiaries, which now manufacture varieties of products.

History of the Company

Golden Harvest has identified the potential for Ready-to-Eat line of products for the people of all levels specially city dwellers with busy life. Some of these are deshi foods namely roti, deshi paratha, aloo paratha, aloo puri, whole chicken, dal puri, vegetable singara, potato chop, different types of evening snacks etc. It is the first ever purpose-built frozen vegetables and snack food processing plant in Bangladesh. The entire Plant was designed and supervised by the Danish experts with the full technical assistance from DANIDA (Danish International Development Agency under the Danish Embassy). The company has become success to establish an international class of cold chain network (a temperature controlled supply chain) from farmers to end user or customers to ensure better product quality. It has got several certifications of national and international institutions in terms of foods standard and quality management system such as, ISO 9001:2008, (which is the international standard on quality management system) ISO 22000:2005, (which is the international standard on food safety management system applied in food chain) HACCP, (which is a systematic preventive approach to food safety from biological, chemical and physical hazards in production process) BSTI, (Certification centers on essential elements of products and quality management system).

Corporate Social Responsibility

The company is also concern about the responsibility to the society and stakeholders on a voluntary basis and runs a CSR program that includes Bangladesh Human Rights Foundation, TAC Charitable Hospital, Alvina Samdani Trust and Samdani Art Foundation.

Vision

To be the most trusted and preferred brand to every household of Bangladesh.

Mission

Consistently deliver international standard innovative products and services for improved lifestyle.

The Rights Issue

Golden Harvest Agro Industries Ltd plans to increase paid-up capital through issuance of Rights Shares. The Board of Directors of GHAIL in its 126th meeting held on October 27, 2018, recommended for issuance of **119,909,790** Ordinary Shares of **Tk.10.00** each at an issue price of **Tk.10.00** per share, totaling **Tk. 1,199,097,900** offered on the basis of 01[R]:01, i.e. 01 (one) right shares for every 01 (one) existing ordinary share held on the record date for entitlement of Rights Share. Later the Board of Directors in its board meeting held on April 7, 2019 recommended to revise the right offer for issuance of **89,932,342** ordinary shares at par totaling **Tk. 899,323,420.00/-** at 3(Three) [R]: 4(Four) ratio i.e. 3(Three) Rights shares for every 4(Four) existing shares held on the record date which has been approved in the 7th extra ordinary general meeting (EGM) held on May 26, 2019. Subject to approval of Bangladesh Securities and Exchange Commission (BSEC).

Issue Price

The Rights offer is issuance of **89,932,342** Ordinary Shares of **Tk.10.00** each at an issue price of **Tk.10.00** per share, totaling **Tk. 899,323,420.00/-** offered on the basis of 03[R]:04, i.e. 03 (three) right shares for every 04 (four) existing share held on the record date for entitlement of Rights Share.

RISK FACTORS AND MANAGEMENT PERCEPTION ABOUT THE RISKS [see rule-8(c)]

Risk is always associated with investments and investing in any company belonging to whatever sector has its own both internal and external risk factors. Golden Harvest Agro Industries Limited is exposed to various forms of industrial, operational, environmental and financial risk arising from transactions entered into and the economic environment within which it operates. GHAIL Enterprise Risk Management (ERM) Division, is very highly related and connected to "Sustainability" and forms a part of the Company's business process. The objective of the Risk Management Strategy of the Company is to identify and manage risk, risk mitigation, harness opportunities, adapt to changing environment and adopt long-term and short-term strategies which link well with the overall objectives of the Company and the Group. Risks are identified and assessed through a Risk Control Self-Assessment (RCSA) document unique to the Company's business. The Company rates its level of risk for each identified risk event using an evaluation of the expected severity of impact of the risk event and the likelihood of its occurrence. Further, the velocity of impact of a risk event, or the speed at which the risk event will impact the organization, in the RCSA document, has served to priorities risks and their relevant mitigation plans. The Company is the ultimate owners of their risks and are responsible for reviewing their RCSA form on a quarterly basis. This reviewed RCSA form is then considered by the GHAIL ERM division in consolidating risks for the Group.

The information given below does not assert to be exhaustive. Additional risks or uncertainties are presently not known to the company or that are currently deemed immaterial may also have a material adverse effect on the Company's business, financial condition and operating results. The order in which the risks are presented below is not intended to provide an indication of the likelihood of their occurrence nor of their severity or significance.

Prior to accepting their Entitlements, Applicants should carefully consider the following risk factors, as well as the other information contained in this right offer documents.

i) Internal risk factors may include, among others:

1. Credit Risks:

This is the risk of default on a debt that may arise because of default by the borrower to pay the loan. In operating any business there is always credit risk lies in the business. As there is always lending and borrowing between parties in the form of money and goods.

Management Perception:

The Company mitigates such risk by distributor financing system, credit evaluation of dealers, holding of bank guarantees, evaluation of creditworthiness before approval of additional credit together with measures to adequately safeguard exposures with sufficient asset backed securities.

2. Liquidity Risks:

The risk that a company may be unable to meet short term financial demands. This usually occurs due to the inability to convert its current assets to cash without a loss of capital or income. Liquidity is a common phenomenon of the business.

Management Perception:

GHAIL has a history of on time payments and receipts and has built up substantial cash reserves since its inception. The company processes receipts daily and has strict controls over its daily cash inflow and outflow. Cash generation from existing operations is adequate to meet expected outlays. In stressed conditions, the company's strong financials will help them secure external financing.

3. Risk associated with the issuer's interest in subsidiaries, joint ventures and associates;

If the subsidiaries make loss it affects parent company's financial statements. In case of associates there is a chance of decline value of investment in associates' company. On the other hand, in a joint venture each of the participants is responsible for profit and losses associates with it.

Management Perception:

The issuer has two subsidiaries which are same in line (food industry) namely Golden Harvest Ice Cream and Golden Harvest Dairy their products are Icecream and milk products respectively. The issuer has good control over these companies in terms of supervision and corporate services resulting both of them have a well contribution to parent (GHAIL) company. However, if these subsidiaries suffer or there is a chances of loss GHAIL is ready to support more by providing services from more competent persons from parent. The issuer has one associate (Golden Harvest QSR Ltd), which is a loss-making company. But the investment is very low compared to subsidiaries and the issuer has no plan to invest more in it. So, there are no pictorial risks associated with its subsidiaries and associate in near future.

4. Significant revenue generated from limited number of customers, losing any one or more of which would have a material adverse effect on the issuer;

If the company's revenue base is connected with few customers, losing any business from any customer of that limited base may affect the company adversely.

Management Perception:

The issuer is related to food industry so, by nature there is a limited chance of bulk sale to individual customer except some of the corporate sales so, losing any single customer will not affect significantly to its revenue. However, GHAIL always maintain good customer relationship by providing qualityful products for end users/customers on the other hand the issuer is increasing its customer data base day by day. So, risk associated with losing few customers is almost nothing.

5. Dependency on few or single supplier of raw materials, failure of which may affect production adversely;

If the company depends on a single supplier for products or raw materials, failure of the supplier to deliver products may affect the production of the company badly.

Management Perception:

The company has many renowned suppliers that help to get competitive advantage over other and doing business efficiently as well as, raw material suppliers of food industry which is needed for issuer is not limited in Bangladesh (an agriculturally based country). With this view, GHAIL is not dependent on a single or few suppliers.

6. More than 20% revenue of the issuer comes from sister concern or associate or subsidiary;

If large scale of revenue of the issuer comes from sister concern or associate or subsidiary then, it is most likely dependable on its subsidiary or associates. Negative impact on their financial statements also affect the financial statements of issuer.

Management Perception:

Among two subsidiaries and one associate only one subsidiary's (Golden Harvest Ice Cream) contribution is more than 20% of total revenue which is 63%. The cause of large percentage is the percentage of holding amounting 99.9998% of total ordinary shares of subsidiary company (Golden Harvest Ice Cream). As the issuer is holding almost 100% of this subsidiary so, it is under the close supervision of issuer to mitigate all the risk associated with it.

7. Negative earnings, negative cash flows from operating activities, declining turnover or profitability, during last five years, if any;

Management Perception:

We have been operating our business efficiently. We are profitable entity and we have not experienced with negative earning and negative cash flow from operating for last five years.

8. Risk associated with useful economic life of plant and machinery, if purchased in second hand or reconditioned;

If second hand mechaneries are purchased or used, there is a chance of machinery breakdown consequensing high repair and maintainance cost and reduction of productivity.

Management Perception:

We are used to using brand new machineries. Hence, there is no chance to use second hand or reconditioned machineries.

09. Potential conflict of interest, if the sponsors or directors of the issuer are involved with one or more ventures which are in the same line of activity or business as that of the issuer and if any supplier of raw materials or major customer is related to the same sponsors or directors.

In these cases, there is high chance of compromise among the related companies because of conflict of Interest.

Management Perception:

GHAIL is always maintaining arm's length transaction with all of its relatd party. So, risk related to conflict of interest is not potential.

10. Related party transactions entered into by the company those may adversely affect competitive edge.

Related party transaction of the issuer creates conflict of interest which reduces the competitive advantage of the issuer.

Management Perception:

GHAIL did not engage any such transaction, which may adversely affect competitive edge.

11. Any restrictive covenants in any shareholders' agreement, sponsors' agreement or any agreement for debt or preference shares or any restrictive covenants of banks in respect of the loan or credit limit and other banking facilities;

All information must be known to the potential investor so that investor's interest may not be hampered in future. So, any restrictive covenants, if it goes against potential investors, will make investors in threat.

Management Perception:

There is no such type of covenants on GHAIL except some restrictive covenants of the banks like changes of sponsor directors and some mortgage agreements.

12. Business operations may be adversely affected by strikes, work stoppages or increase in wage demands by employees.**Management Perception:**

Employee unrest may occur in any time of business and it is important to deal with labour unrest carefully. GHAIL has been operating business since 2006 and it is a profitable entity. We have different incentive packages for our employees so that they can be beneficial to such package. Because we believe that employees are very important part of our business and we all know that there are government rules relating to paying minimum wage.

13. Seasonality of the business of the issuer;

Fluctuation of sales revenue in different seasons may be a risk factor for any business. Because cash flow in unseason is suppose to be very low or in some business sectors it is almost zero but, some of the cost are fixed in all seasons.

Management Perception:

The issuer and its subsidiaries are operating food "which is one of the basic needs of humanbeing" business. So, there is no seasonal variation in this sector.

14. Expiry of any revenue generating contract that may adversely affect the business;

Contracts which is suppose to be expire within short time indicates future fall of revenue therefore profit.

Management Perception:

GHAIL has no such type of contract, materially affect the business due to its termination. However, there are some contracts of corporate sales which is renewed periodically.

15. Excessive dependence on any key management personnel absence of whom may have adverse effect on the issuer's business performance;

Excessive dependence on key management affects the business if the management is changed in future, which will create vacuum. Besides, if the key management personnel are of bad intention, excessive dependence will also affect the business.

Management Perception:

GHAIL has been running its business over a long time with name and fame. It is a structured Company. It practices strong human resources management and corporate governance principles. Succession planning is always in our mind and Company is running very professionally. As such, there is very little possibility of adversely affect the business due to excessive dependence on key management personnel.

16. Enforcement of contingent liabilities which may adversely affect financial condition;

Contingent liabilities are future potential liabilities having impact on financial statements if it is probable. It reduced the assets or create obligation to pay the liabilities.

Management Perception:

There are no such types of issues in business operation of the issuer for which contingent liabilities may arise in future.

17. Insurance coverage not adequately protect against certain risks of damages;

Insurance ensures and protects to deal with uncertainty of future material loss/damage. So, insurance coverage is important for the business.

Management Perception:

We have fire insurance coverage for all the relating issues that are risky to operating our business and also have group insurance for employees.

18. Absence of assurance that directors will continue its engagement with Company after expiry of lock in period;

Directors run the company with the accumulated finance from public and other financing source. If directors discontinue to run the business, there will be negative impact on business and share price as well.

Management Perception:

Directors of GHAIL are involved in the business for long time as well as some of them are sponsor director and they will continue the business after expiry of lock in period as well.

19. Ability to pay any dividends in future will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditure;

Dividend payment is highly dependent on company's ability to generate positive cash flow from operating profit of the business. If company cannot earn good amount of profit from operation, it is unlikely to pay dividend.

Management Perception:

We have been a profitable entity over a long time and the profit is on the uptrend. So, we are in belief that we will be able to pay dividend from our earning profit. GHAIL is declaring a handsome dividend to the shareholders of the company.

20. History of non-operation, if any;

History of non-operation indicates weak operational management of the company. Non-operation leads to negative cash flow, incurring of losses and bankruptcy in worst case scenario.

Management Perception:

The Company is in commercial operation since May, 2006. There is no history of non-operation in business of the company till now. The Company is an independent body which is operated by its Memorandum & Articles of Association and other applicable laws and regulations of the country. The financial strength of the Company is very satisfactory. The Directors of the Board are well reputed and experienced and the operation of the company is guided by good team of professionals. Demand for the products of the company is increasing day by day. So, the chance of non-operation of the business of the Company is almost nil.

21. Risks related to engagement in new type of business, if any;

If it is new business, there is risk of feasibility of the new business.

Management Perception:

There is no as such risk relating to engagement in new type of business.

22. Risk in investing the securities being offered with comparison to other available investment options;

If the issue price goes down after floating, there is investment risk for the prospective investors.

Management Perception:

We are profitable entity over long time and we have been operating our business efficiently. Therefore, it is not risky in investing securities in comparison with other available investment option.

23. Any penalty or action taken by any regulatory authorities for non-compliance with provisions of any law;

Action taken by the regulatory authority creates a negative impact on the issuer.

Management Perception:

No penalty or action taken by any regulatory authorities for non-compliance with provisions of any law in the history of GHAIL.

24. Litigations against the issuer for Tax and VAT related matters and other government claims, along with the disclosures of amount, period for which such demands or claims are outstanding, financial implications and the status of the case;

Such type of litigation for Tax and VAT related matters are always harmful for company's reputation.

Management Perception:

There is no litigation relating to Tax, VAT or other government claims against the issuer company.

25. Registered office or factory building or place of operation is not owned by the issuer;

Factory building should be owned by the company. Otherwise, there is risk of hike in factory rent in the years to come and threat of shifting the factory sometimes along with dismantling cost as well.

Management Perception:

The registered office and factory premises are fully owned property of the issuer so, there is no risk in this regard.

26. Lack of renewal of existing regulatory permissions/ licenses;

Lack of renewal of permission/ licenses may cause penalty and others action.

Management Perception:

Renewals and reregistrations of different types of permissions / licenses are continuous process and there is no lack of renewal of these permissions / licenses of the issuer.

27. Failure in holding AGM or declaring dividend or payment of interest by any listed securities of the issuer or any of its subsidiaries or associates;

Failure in holding AGM or declaring dividend may indicates a bad impression to the shareholders and the market price of the issuer.

Management Perception:

The issuer is conducting its Annual General Meeting (AGM) regularly and declaring satisfactory dividend (cash/stock) to all of its shareholders every year. The history of last five years are as follows:

Accounting Year	AGM Title	Date of AGM held & Dividend declared	Declared Dividend
			Rate (%)
2013-2014	10 th AGM	December 15, 2014	Cash- 10%
			Stock- Nil

2014-2015	11 th AGM	December 15, 2015	Cash- Nil
			Stock- 10%
2015-2016	12 th AGM	December 29, 2016	Cash- Nil
			Stock- 10%
2016-2017	13 th AGM	December 21, 2017	Cash- Nil
			Stock- 10%
2017-2018	14 th AGM	December 19, 2018	Cash- Nil
			Stock- 10%

28. Issuances of securities at lower than the IPO offer price within one year;

The management ultimate goal is to maximize the wealth of the company. If share price goes up, it maximizes wealth of the company. On the other hand, if share price goes down, it minimizes the wealth of the company.

Management Perception:

The issuer did not issue any securities lower than IPO offer price or GHAIL has no plan to do so within one years of time.

29. Refusal of application for public issue of any securities of the issuer or any of its subsidiaries or associates at any time by the Commission;

If any refusal happened in the above cases, it will create negative impression on the issuer.

Management Perception:

Such cases did not happen for our company, any of our subsidiaries or associates.

ii) External risk factors may include, among others:

1. Interest Rate Risks:

Interest rate risk is the risk that Company faces for paying more interest on loan taken due to unfavorable movement in the interest rates for Government's monetary policy changes, Furthermore, increased demand for loans is another reason for hike in interest rates. Such interest rates rise affect Companies mostly if they have loans of floating interest rate or Companies investing in debt securities.

Management Perception:

The Company's policy is to manage its interest rate risk using a mix of fixed and variable rate debt, taking advantage of the changes in the market rates, issuing long term floating rated bond within reasonable rate range. Guidance received from GHAIL Group Treasury division with respect to forecasting of interest rates has been of immense value in management of this interest risk exposure.

2. Exchange Rate Risk:

Exchange rate risk occurs due to unfavorable changes in exchange rates. For say if Company import equipment/raw materials from abroad and the foreign currency value appreciates then it has to pay more now than what it was supposed to pay before. On the other hand, if foreign currency value depreciates of market where it sells its product then the company will lose its competitive edge in foreign market.

Management Perception:

Along with the changing eating habits of the urban people the demand of frozen/ready to eat foods are increased rapidly which, was previously meeting by importing from abroad. So, GHAIL is almost busy to meet the local demand and recently it is selling all (100%) of its products to local market only.

3. Industry Risk:

Industry risk refers to the risk of increased competition from foreign and domestic sources leading to lower prices, revenues, profit margin, and market share which could have an adverse impact on the business, financial condition and results of operation.

Management Perception:

Agro industry in Bangladesh is an emerging sector with vast local demand for its different product lines. Locally produced frozen products now play a significant role in this sector, which has been dominated by imports in the past. The Company has established its brand name in Frozen Food market with its quality products, range of products and customer services. However, to develop an infrastructure, both public and private sector participation is required. This is the focal point of Golden Harvest's future expansion plans.

4. Market related Risk:

Market risk refers to the risk of adverse market conditions affecting the sales and profitability of the Company. Mostly, the risk arises from falling demand for the product or service which would harm the performance of the Company.

Management Perception:

Market for Ready to Cook frozen foods in Bangladesh is growing at an exponential rate with growth of urbanization and incremental income level of consumers along with their preference to convenience. In spite of high growth of this market, there is scarcity of investment in this sector which creates a huge demand-supply gap resulting in very expensive imports. International market for Ready to Cook frozen food sector is already matured and is growing further at a high rate. In Bangladesh market, Golden Harvest has made a rapid penetration and has captured the leading position with its unique branding and positioning strategy taking opportunity of this fast-growing market.

5. Vulnerabilities from IT Related Risks:

Information technology risk, IT risk, IT-related risk, or Cyber Risk is any risk related to information technology. While information has long been appreciated as a valuable and important asset, the rise of the knowledge economy and the Digital Revolution has led to organizations becoming increasingly dependent on information, information processing and especially IT. Various events or incidents that compromise IT in some way can therefore cause adverse impacts on the organization's business processes or mission, ranging from inconsequential to catastrophic in scale.

Management Perception:

GHAIL relies on Information Technology to obtain a competitive advantage, whilst recognizing the need for stringent internal controls and IT governance policies. The GHAIL Group's IT governance structures and policies are followed by GHAIL having a disaster recovery readiness in all business systems. Dedicated professionals and use of appropriate software ensure continuity of business operations and safeguard from IT related risks including maintaining up to date virus definition files & firewalls, daily, weekly & monthly "on site" & "offsite" data backups, enable cloud storage for all users, conduct quarterly internal audits by IT department based on a checklist and setting up of early warning mechanism to mitigate possible infrastructure failures.

6. Potential or existing government regulation:

The Company operates primarily under Companies Act 1994, Taxation policy adopted by NBR, and rules adopted by other regulatory organizations. Any abrupt changes of the policies formed by those bodies will impact the business of Company adversely. Unless adverse policies are taken, which may materially affect the industry as a whole; the business of the Company will not be affected.

Management Perception:

Agro industry in Bangladesh is an emerging sector with considerable local demand for different product lines. It is also an import substitute industry and with changes of living standards of people, demand for such products will increase. Therefore, it is highly unlikely that the Government will initiate any measure that may have adverse impact on the growth of the industry. However, the company management is concerned very much to co-opt any future regulatory requirements.

7. Potential Changes in Global and National Policies:

The performance of the Company may be affected by the political and economical instability both in Bangladesh and worldwide. Any instance of political turmoil and disturbance in the country may adversely affect the economy in general.

Management Perception:

Since inception, the company has engaged its efforts to comply with all regulatory requirements in respect of day-to-day business activities, production, distribution and quality control measures. Total business activities of the company

run on the latest state of the art technology and so far, comply with the quality control requirements of home and abroad. It is expected that demand for products of the company will increase and the Govt. of Bangladesh will create friendly environment for such export oriented and import substituting industries. The Company is always aware of adopting all types of measures to comply with any change in national or global policies to keep its operations smooth.

8. Economic Risks:

Our performance and growth are dependent on the health of the Bangladesh economy. The economy could be adversely affected by various factors such as political or regulatory action, including adverse changes in liberalization policies, social disturbances, terrorist attacks and other acts of violence or war, natural calamities, commodity and energy prices and various other factors. Any significant changes may adversely affect our business and financials.

Management Perception:

Bangladesh economy is booming for last few years. Consistent industrial growth along with increased agricultural production has made the Per Capita Income higher than that of recent years. In addition, favorable government policies and industry friendly policies by other regulatory bodies have proved to be congenial to the economy of the country.

9. Political Risks:

Bangladesh is prone to serious unrest in the political condition which produces Hartal, RoadBlock and many other barriers to the business. This could also propel the cost of the product upwards.

Management Perception:

During the last forty years of post-independence period, Bangladesh has gone through a variety of political situations. But presently, a sound political atmosphere is prevailing in the country. Both the ruling and opposition parties are committed to the betterment of the country. Last democratic national assembly election and local council polls are instances of peaceful political situation in Bangladesh.

10. Statutory clearances and approvals those are yet to be received by the issuer:

If there is any statutory approval which is pending or not received yet may hamper the business operation of the issuer.

Management Perception:

The company has received all the statutory clearance and approvals for smooth operation of business. Renewal and updates are continuous process and concern department of issuer is well aware of these procedures. So, there is limited degree of risk associated in these regards.

11. Competitive condition of the business:

Competition between businesses is a common phenomenon in every business sector which may badly affect the issuer including reduction of profit therefore EPS.

Management Perception:

GHAIL is one of the early entrances in frozen or ready to eat foods processing sector and become a market leader. Which always help to get competitive advantages from market. Moreover, by providing good quality and hygienic products it has established customers loyalty, helping the issuer to overcome the rival situation.

12. Complementary and supplementary products or services which may have an impact on business of the issuer:

Complementary and supplementary products may have a positive or negative impact on its sales revenue resulting growth or decline of its business.

Management Perception:

The issuer is always aware about market of its products as well as complementary products. GHAIL has an expert team of research and developments, if there is any such type of chance the issuer is always has a capacity to renovate, extend or redesign to take the advantages of situation so risk of opportunity loss is very low.

DATE & TIME OF OPENING AND CLOSING OF SUBSCRIPTION [see rule-8(d)]

Subscription opens for the rights shares offer on **December 08, 2019** and subscription closes for the rights shares offer on **December 30, 2019**.

**Independent Auditor's Report
to
The Shareholders of Golden Harvest Agro Industries Limited**

We have audited the accompanying consolidated financial statements of Golden Harvest Agro Industries Limited ("the company") which comprise statement of financial position as at 30 September 2018 and the statement of profit or loss and other comprehensive income, statement of changes in equity and statement of cash flows and also consolidated financial statements of the company and its subsidiary which comprise consolidated statement of financial position as at 30 September 2018 and the consolidated statement of profit or loss and other comprehensive income, consolidated statement of changes in equity and consolidated statement of cash flows for the period then ended and a summary of significant accounting policies and other explanatory notes.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards (IFRS) and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing (ISA). Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements of the group and the separate financial statements of the company give a true and fair view of the consolidated financial position of the group and the separate financial position of the company as at 30 September 2018, and of its consolidated and separate financial performance and its consolidated and separate cash flows for the period then ended in accordance with International Financial Reporting Standards (IFRSs) and comply with the Companies Act 1994, the Securities and Exchange Rules 1987 and other applicable laws and regulations.

We also report that:

- a) we have obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit and made due verification thereof;
- b) in our opinion, proper books of account as required by law have been kept by the company and its subsidiary so far as it appeared from our examination of these books;
- c) the consolidated statement of financial position and the statement of comprehensive income dealt with by the report are in agreement with the books of account; and
- d) the expenditure incurred was for the purposes of the company's business.

Golden Harvest Agro Industries Limited
Notes to the Financial Statements
For the period ended 30 September 2018

1. Reporting entity

Group profile

Golden Harvest Agro Industries Limited was incorporated on August 10, 2004 as a Private Limited Group; vide Reg. No.-C-53850(515)/2004 under the Companies Act, 1994 and converted to public limited Group on 30 June 2010. The Group has been listed to both the Dhaka Stock Exchange Ltd. and Chittagong Stock Exchange Ltd. on 04 March 2013. The principal place of business and the head office of the Group are at Shanta Western Tower, Level # 5, Space Code # 502, 186, Gulshan, Tejgaon Link Road, Tejgaon Industrial Area, Dhaka-1208. The registered office and factory is located at Bokran, Monipur, Bobanipur, Gazipur Sadar, Gazipur.

Nature of Business Activities

The Company owns and operates the business of growing, procuring, purchasing, processing, packaging, warehousing, transporting, exporting, importing, distributing and selling agriculture based food, food products, vegetable processing. As per the object clause of the Memorandum the Company could also establish any industrial processing unit based on agro based raw materials products within the country and export the same or meet local demand.

1.1 Subsidiaries

Subsidiaries are entities controlled by the Golden Harvest Agro Industries Ltd. An investor controls an investee when it is exposed to, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Golden Harvest Ice Cream Limited and Golden Harvest Dairy Limited are the subsidiaries of the Group.

Golden Harvest Ice Cream Limited (Previous name was Golden Harvest Sea Food and Fish Processing Limited)

Golden Harvest Ice Cream Limited formerly known as Golden Harvest Sea Food and Fish Processing Limited was incorporated on January 05, 2005, vide Reg. No.-C-55601(2285)/05 under the Companies Act, 1994. The objectives of the Group are to carry out the business, promote & establish factories and chain shop or shops; manufacture and manage food and food items, Dairy, Ice Cream, baby food, soft drink, mineral water, salt & iodised salt and allied products in Bangladesh and setting ventures and business is in connection therewith. Golden Harvest Agro Industries Limited acquired 99.9998% of shares of Golden Harvest Sea Food and Fish Processing Limited by exchanging its own shares and acquired its 4,99,999 Ordinary Shares.

Golden Harvest Sea Food and Fish Processing Limited' (GHSFFPL), has been converted into Golden Harvest Ice Cream Limited (GHICL) on 16th May 2013 through the office of Registrar of Joint Stock Companies and Firms.

Golden Harvest Dairy Limited

Golden Harvest Dairy Limited has incorporated on 18 February 2015, vide Reg. No.-C-121268/15 under the Companies Act, 1994 as a Private Limited Group. Golden Harvest Agro Industries Limited acquired 75.00% of shares of Golden Harvest Dairy Limited.

The objectives of the company will process Liquid Milk and milk based product like butter, cream, cheese, yogurt, etc. The project will not be for milk collection only it will support in meat processing and calf selling.

1.2 Associates

An associate is an entity in which Golden Harvest Agro Industries Ltd. (GHAIL) has significant influence whereby the parties that have control of the arrangement have rights to the net assets of the arrangement. GHAIL uses the equity method to account for its investment in associates and in its financial Statement in accordance with IAS-28 "Investment in Associates and Joint Ventures".

Golden Harvest QSR Limited

Golden Harvest QSR Limited has incorporated 04 February 2015; vide Reg. No.-C-128718/2016 under the Companies Act, 1994 as a Private Limited Company. Golden Harvest Agro Industries Limited acquired 30.00% of shares of Golden Harvest QSR Limited. Investment is initially recognized at cost and subsequently measured at equity method.

Golden Harvest QSR Limited launches its business with the brand name 2GO. It is a quick service compact fast food joint. It will provide delicious hot food at an affordable price in very short service time. People can pick the order on the go for their home or have a quick bite inside the shop. The offerings will give a good value for the consumer's money.

1.3 Date of Authorization for issue

The financial statements of Golden Harvest Agro industries Ltd. for the period ended 30 September 2018 were authorized for issue in accordance with a resolution of the Board of Directors on 27 December 2018.

1.4 Reporting Period

The reporting period of the Group covers first quarter from 1st July 2018 to 30th September 2018.

2. Basis of Preparation of Financial Statements

2.1 Statement on Compliance with Local Laws

The financial statements have been prepared in compliance with the requirements of the Companies Act, 1994, Securities and Exchange Rules, 1987 and other relevant local laws as applicable.

2.2 Statement on Compliance of Financial Reporting Standards

The financial statements have been prepared in accordance with International Accounting Standards (IAS) and International Financial Reporting Standards (IFRS).

2.3 Basis of Measurement of Elements of Financial Statements

Measurement is the process of determining the monetary amounts at which the elements of the financial statements are to be recognized and carried in the statement of financial position and profit or loss and other comprehensive income. The measurement basis adopted by Golden Harvest Agro Industries Limited is historical cost except for land, building and plant and machinery which are stated at revalued amount, inventories are at the lower of cost and net realizable value and marketable securities are at market value. Under the historical cost, assets are recorded at the amount of cash or cash equivalents paid or the fair value of the consideration given to acquire them at the time of their acquisition. Liabilities are recorded at the amount of proceeds received in exchange for the obligation, or in some circumstances (for example, income taxes), at the amounts of cash or cash equivalents expected to be paid to satisfy the liability in the normal course of business.

2.4 Basis of Consolidation

Group accounts are prepared on the basis that the parent and subsidiaries are a single entity as per IFRS-10 "Financial Statements". This reflects the economic substances of the group arrangement.

The group financial statements include the financial statements of GHAIL and subsidiaries that it controls. GHAIL prepares financial statements using uniform accounting policies for like transactions and other events in similar circumstances. Consolidation of an investee shall begin from the date the investor obtains control of the investee and cease when the investor loses control of the investee.

GHAIL presents non-controlling interests in the statement of financial position within equity, separately from the equity of the owners of GHAIL. Changes in GHAIL ownership interest in a subsidiary that do not result in losing control of the subsidiary are equity transactions (i.e. transactions with owners in their capacity as owners).

Consolidation procedures

- combine like items of assets, liabilities, equity, income, expenses and cash flows of the parent with those of its subsidiaries.
- offset (eliminate) the carrying amount of the parent's investment in each subsidiary and the parent's portion of equity of each subsidiary.
- eliminate in full intergroup assets and liabilities, equity, income, expenses and cash flows relating to transactions between entities of the group (profits or losses resulting from intergroup transactions that are recognised in assets, such as inventory and fixed assets, are eliminated in full). Intergroup losses may indicate an impairment that requires recognition in the financial statements.

Loss of control of Subsidiaries

If GHAIL loses control over its subsidiaries, GHAIL:

- derecognises the assets and liabilities of the former subsidiary from the statement of financial position.
- recognises any investment retained in the former subsidiary and subsequently accounts for it and for any amounts owed by or to the former subsidiary in accordance with relevant IFRSs.
- recognises the gain or loss associated with the loss of control attributable to the former controlling interest.

Equity method

Under the equity method, on initial recognition the investment in an associate is recognised at cost, and the carrying amount is increased or decreased to recognise the investor's share of the profit or loss of the investee after the date of acquisition. The investor's share of the investee's profit or loss is recognised in the investor's profit or loss. If the carrying amount of the investment in the associate has been reduced to zero, no further losses are recognized by the group. The parent is only required to make a provision for any additional losses incurred by the associate to the extent that the parent has a legal or constructive obligation to make good these amounts. Adjustments to the carrying amount may also be necessary for a change in the investor's proportionate interest in the investee arising from changes in the investee's other comprehensive income. Such changes include those arising from the revaluation of property, plant and equipment and from foreign exchange translation differences. The investor's share of those changes is recognised in the investor's other comprehensive income.

Investment in subsidiaries and associates in GHAIL separate financial statements

When GHAIL prepares separate financial statements, the GHAIL using the equity method for investment in subsidiaries and associates:

2.5 Going Concern

At each quarter end management of the Group makes assessment of going concern as required by IAS-1. The company has adequate resources to continue in operation for the foreseeable future and has wide coverage of its liabilities. For this reason, the directors continue to adopt going concern assumption while preparing the financial statements.

2.6 Accrual Basis of Accounting

GHAIL prepares its financial statements, except for cash flow information, using the accrual basis of accounting. Since the accrual basis of accounting is used, GHAIL recognizes items as assets, liabilities, equity, income and expenses (the elements of financial statements) when they satisfy the definitions and recognition criteria for those elements in the Framework.

2.7 Functional and presentation currency

The financial statements are prepared and presented in Bangladesh Taka/BDT, which is the Group's functional currency. The Group earns its major revenues in BDT and all other incomes/expenses and transactions are in BDT and the competitive forces and regulations of Bangladesh determine the sale prices of its goods and services. Further, the entire funds from financing activities are generated in BDT.

Foreign currency translation

Foreign currency transactions are booked in the functional currency of the Group at the exchange rate ruling on the date of transaction. Foreign currency monetary assets and liabilities are retranslated into the functional currency at rates of exchange at the balance sheet date. Exchange differences are included in the income statement.

2.8 Materiality and Aggregation

Each material class of similar items is presented separately in the Financial Statements. Items of a dissimilar nature or function are presented separately unless they are immaterial.

2.9 Offsetting

GHAIL does not offset assets and liabilities or income and expenses, unless required or permitted by an IFRS.

2.10 Comparative Information and Rearrangement thereof

Comparative information has been disclosed in respect of the previous period for all numerical information in the financial Statements and also the narrative and descriptive information when it is relevant for understanding of the current period financial statements. Previous period figure has been re-arranged whenever considered necessary to ensure comparability with the current period's presentation as per IAS-8: "Accounting Policies, Changes in Accounting Estimates and Errors"

2.11 Use of Estimates and Judgments

The preparation of financial statements in conformity with Bangladesh Financial Reporting Standards requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses and for contingent assets and liabilities that require disclosure, during and at the date of the financial statements.

Actual results may differ from these estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions of accounting estimates are recognized in the period in which the estimate is revised and in any future periods affected as required by IAS 8: "Accounting Policies, Changes in Accounting Estimates and Errors"

In particular, significant areas of estimation uncertainty and critical judgments in applying accounting policies that have the most significant effect on the amounts recognized in the financial statements include depreciation, amortization, impairment, net realizable value of inventories, accruals, taxation and provision.

2.12 Changes in Accounting Policies, Estimate and Errors

The effect of a change in an accounting estimate shall be recognised prospectively by including it in profit or loss in:

- (a) the period of the change, if the change affects that period only; or
- (b) the period of the change and future periods, if the change affects both.

To the extent that a change in an accounting estimate gives rise to changes in assets and liabilities, or relates to an item of equity, it shall be recognised by adjusting the carrying amount of the related asset, liability or equity item in the period of the change.

Changes in accounting policies and material prior period errors shall be retrospectively corrected in the first financial statements authorised for issue after their discovery by:

- (a) restating the comparative amounts for the prior period(s) presented in which the error occurred; or
- (b) if the error occurred before the earliest prior period presented, restating the opening balances of assets, liabilities and equity for the earliest prior period presented.

2.13 Structure, Content and Presentation of Financial Statements

The Financial Statements of Golden Harvest Agro Industries Ltd., as at and for the period ended 30 September 2018 comprise the Group and its Subsidiaries namely Golden Harvest Ice Cream Ltd., Golden Harvest Dairy Ltd. (together referred to as the 'Group' as per IFRS-10 Financial Statements) and also Golden Harvest QSR as per IAS 28 Investment in Associate. Being the general purpose financial statements, the presentation of these financial statements is in accordance with the guidelines provided by IAS 1: "Presentation of Financial Statements". A complete set of financial statements comprise:

- i) Statement of financial position as at 30 September 2018;
- ii) Statement of profit or loss and other comprehensive Income for the period ended 30 September 2018;
- iii) Statement of changes in equity for the period ended 30 September 2018;
- iv) Statement of cash flows for the period ended 30 September 2018; and
- v) Notes comprising a summary of significant accounting policies and other explanatory information to the accounts for the period ended 30 September 2018.

2.14 New accounting standards not yet adopted

Certain new accounting standards and interpretations have been published that are not mandatory for 30 September 2018 reporting periods and have not been early adopted by the Company.

a) IFRS 15: Revenue from Contracts with Customers

This standard is based on the principle that revenue is recognised when control of a good or service transfers to a customer, this notion of control replaces the existing notion of risks and rewards. The standard is mandatory for reporting periods commencing on or after 1 January 2018. The Company is currently assessing the implications and consequences of this standard.

b) IFRS 9: Financial Instruments

This standard addresses the classification, measurement and derecognition of financial assets and financial liabilities and introduces new rules for hedge accounting. The standard is mandatory for reporting periods commencing on or after 1 January 2018. The Company is currently assessing the implications and consequences of this standard.

3. Summary of Significant Accounting Policies

The accounting policies set out below are consistent with those used in the previous period. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Golden Harvest Agro Industries Limited.

3.1 Property, Plant and Equipment

Initial Recognition and Measurement

An item shall be recognized as property, plant and equipment if, and only if it is probable that future economic benefits associated with the item will flow to the entity, and the cost of the item can be measured reliably IAS 16.

Property, plant and equipment are initially recognized at cost and subsequently land, buildings & civil constructions and plant & machineries are stated at fair value. The property, plant and equipment are presented at cost/fair value, net of accumulated depreciation and/or accumulated impairment losses, if any. The cost of an item of property, plant and equipment comprises its purchase price, import duties and non-refundable taxes, after deducting trade discount and rebates, and any costs directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the intended manner. The cost also includes the cost of replacing part of the property, plant and equipment and borrowing costs

for long-term debt availed for the construction/Implementation of the PPE, if the recognition criteria are met.

Subsequent costs

The cost of replacing part of an item of property, plant and equipment is recognised in the carrying amount of an item if it is probable that the future economic benefits embodied within the part will flow to the Group and its cost can be measured reliably. The costs of the day-to-day servicing of property, plant and equipment are recognised in the profit and loss account as 'Repair & Maintenance' when it is incurred.

Subsequent Measurement

Property, Plant and equipment are disclosed at cost less accumulated depreciation consistently over periods. On 30 June 2009, 30 June 2011 and 30 June 2013. Land and Land Developments, Building and other constructions and Plant and Machinery have been revalued to reflect fair value (prevailing market price) thereof following "Current Cost Method".

Depreciation on Property, Plant and Equipment

Depreciation is provided to amortize the cost or valuation of the assets after commissioning, over the period of their expected useful lives, in accordance with the provisions of IAS 16: Property Plant and Equipment. Depreciation of an asset begins when it is available for use, i.e. when it is in the location and condition necessary for it to be capable of operating in the manner intended by management. Depreciation is charged on all Property, Plant and Equipment except land and land developments on reducing balance method at the following rates:

Particular of Assets	Rate of Depreciation
Buildings and other constructions	2.5%
Plant & Machinery	5%
Office Equipment	10%
Furniture and Fixtures	10%
Vehicle	10%
Freezer	10%

Revaluation of Property, Plant and Equipment of Golden Harvest Agro Industries Limited

The Group made revaluation of the Group's Land and Land developments, Buildings and Plant and Machinery as of 30 June 2009, 30 June 2011 and 30 June 2013 to reflect fair value thereof in terms of Depreciated current cost thereof. The revaluation has conducted by Ata Khan & Co, Chartered Accountants.

The increase in the carrying amount of revalued assets is recognized in other comprehensive income under the head Revaluation Surplus. Other Fixed Assets were kept outside the scope of revaluation works. These are expected to be realizable at written down value (WDV) thereof mentioned in the statement of financial position of the Group.

3.2 Capital work-in-progress

Capital work in progress represents the cost incurred for acquisition and construction of items of property, plant and equipment that were not ready for use at the end of 30 September 2018 and these were stated at cost. In case of import components, capital work in progress is recognised when risks and rewards associated with such assets are transferred to the Group, i.e. at the time of shipment is confirmed by the supplier.

3.3 Intangible Assets Recognition

The recognition of an item as an intangible asset requires GHAIL to demonstrate that the item meets the definition of an intangible asset and the recognition criteria. An intangible asset is recognized as an asset if, and only if:

- it is probable that expected future economic benefits that are attributable to the asset will flow to GHAIL; and
- the cost of the item can be measured reliably.

Measurement

An intangible asset is measure at cost less any accumulated amortisations and any accumulated impairment losses. Subsequent expenditures are likely to maintain the expected future economic benefits embodied in an existing intangible asset rather than meet the definition of an intangible asset and the recognition criteria. In addition, it is often difficult to attribute subsequent expenditure directly to a particular intangible asset rather than to the business as a whole. Therefore, expenditure incurred after the initial recognition of an acquired intangible asset or after completion of an internally generated intangible asset is usually recognised in profit or loss as incurred. This is because such expenditure cannot be distinguished from expenditure to develop the business as a whole.

Separately acquired intangibles

The cost of a separately acquired intangible asset comprises:

- its purchase price, including import duties and non-refundable purchase taxes, after deducting trade discounts and rebates;
- and any directly attributable cost of preparing the asset for its intended use.

Internally generated intangible assets

The cost of an internally generated intangible asset is the sum of expenditure incurred from the date when the intangible asset first meets the recognition criteria. The cost of an internally generated intangible asset comprises all directly attributable costs necessary to create, produce, and prepare the asset to be capable of operating in the manner intended by management.

Research Phase

No intangible asset arising from research (or from the research phase of an internal project) is recognised. Expenditure on research (or on the research phase of an internal project) is recognised as an expense when it is incurred.

Development Phase

An intangible asset arising from development (or from the development phase of an internal project) is recognised in IAS-38, "Intangible assets".

The Group's intangible assets include computer software development (ERP), Design, construction and development of products, Augmented Reality.

Internally generated brands, mastheads, publishing titles, customer lists and items similar in substance are not recognised as intangible assets.

Recognition of an expense

Income cases, expenditure are incurred to provide future economic benefits to an entity, but no intangible asset or other asset is acquired or created that can be recognised. Foreexample, expenditure on research is recognised as an expense when it is incurred, except when it is acquired as part of a business combination. Other examples of expenditure that is recognised as an expense when it is incurred include:

- expenditure on start-up activities ie start-up costs/ pre-operating cost.
- expenditure on training activities.
- expenditure on advertising and promotional activities.
- expenditure on relocating or reorganising part or all of an entity.

Past expenses

Expenditure on an intangible item that was initially recognised as an expense is not recognised as part of the cost of an intangible asset at a later date.

Revaluation of intangibles

The revaluation model requires an intangible asset shall be carried at a revalued amount, being its fair value at the date of the revaluation less any subsequent accumulated amortisation and any subsequent accumulated impairment losses. However, fair value shall be measured by reference to an active market. The revaluation model does not allow the revaluation of intangible assets that have not previously been recognised as assets; or the initial recognition of intangible assets at amounts other than cost.

Amortization

The depreciable amount of an intangible asset with a finite useful life shall be allocated on a systematic basis over its useful life. Amortisation begin when the asset is available for use, ie when it is in the location and condition necessary for it to be capable of operating in the manner intended by management. Amortisation cease at the earlier of the date that the asset is classified as held for sale and the date that the asset is derecognised. An intangible asset with an indefinite useful life is not amortised.

Amortisation of the intangible asset with a finite useful life is calculated using the reducing balance method to write down the cost of intangible assets to their residual values over their estimated useful lives as follows:

Particulars	Rate
Software (at development stage)	0%
Design, construction and development of products	10%
Augmented Reality	10%

Derecognition of intangible assets

The carrying amount of an item of intangible assets is derecognised on disposal or when no future economic benefits are expected from its use or disposal. The gain or loss arising from the derecognition of an item of intangible assets is included as other income in profit or loss when the item is derecognised. When the revalued assets are disposed off, the respective revaluation surplus is transferred to retained earnings.

3.4 Biological Asset

Recognition and measurement

Biological asset is a living plant or animal. Biological asset are measured at fair value less costs to sell, both on initial recognition and each reporting date. Cost to sell includes sale commission and regulatory levies but exclude transport to market. Transport costs are in fact deducted from market value in order to reach fair value. The gain on initial recognition and from a change in this value is recognized in profit or loss. The interest on the loan taken out to finance the acquisition is not a cost to sell. The milk is agriculture product and is recognized initially under IAS-41 at fair value less cost to sell. (at this point it is taken into inventories and dealt with under IAS-2). The gain on initial recognition should be recognized in profit or loss.

3.5 Impairment of Assets

Recognising and measuring impairment loss

If the recoverable amount of an asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. That reduction is an impairment loss. An impairment loss on a non-revalued asset is recognised in profit or loss. However, an impairment loss on a revalued asset is recognised in other comprehensive income to the extent that the impairment loss does not exceed the amount in the revaluation surplus for that same asset. Such an impairment loss on a revalued asset reduces the revaluation surplus for that asset.

GHAIL assesses at the end of each reporting period whether there is any indication that an asset may be impaired. If any such indication exists, GHAIL estimate the recoverable amount of the asset. Irrespective of whether there is any indication of impairment, GHAIL tests:

- an intangible asset with an indefinite useful life or an intangible asset not yet available for use for impairment annually

3.6 Accounting for lease

Finance lease

Finance lease is a lease that transfers substantially all the risks and rewards incidental to ownership of an asset. Title may or may not eventually be transferred.

Initial recognition

At the commencement of the lease term, GHAIL recognises finance leases as assets and liabilities in their statements of financial position at amounts equal to the fair value of the leased property or, if lower, the present value of the minimum lease payments, each determined at the inception of the lease. Any initial direct costs of the lessee are added to the amount recognised as an asset.

Subsequent measurement

Minimum lease payments are apportioned between the finance charge and the reduction of the outstanding liability. The finance charge is allocated to each period during the lease term so as to produce a constant periodic rate of interest on the remaining balance of the liability. Contingent rents are charged as expenses in the periods in which they are incurred.

A finance lease gives rise to depreciation expense for depreciable assets as well as finance expense for each accounting period. The depreciation policy for depreciable leased assets is consistent with that for depreciable assets that are owned, and the depreciation recognised is calculated in accordance with IAS 16 Property, Plant and Equipment and IAS 38 Intangible Assets. If there is no reasonable certainty that the lessee will obtain ownership by the end of the lease term, the asset is fully depreciated over the shorter of the lease term and its useful life.

Operating leases

Lease payments under an operating lease are recognised as an expense on a straight-line basis over the lease term unless another systematic basis is more representative of the time pattern of the user's benefit.

Applying the requirement of International Financial Reporting Interpretation (IFRI) 4: Determining whether an Arrangement contains a Lease, the Power Purchase Agreement (PPA) between the Company / Group units and BPDB/BREB can be said to contain a lease arrangement. This could be interpreted as resulting in the transfer of substantially all of the risks and rewards incidental to the ownership to the underlying assets (power plant) to the off taker (BPDB/BREB) who would effectively be the lessee. However, management concluded that the PPA does not transfer substantially all risks incidental to ownership as per the requirement of para 17 of IAS 17. As such, all these lease arrangements are considered as an operating lease.

3.7 Capitalization of Borrowing Cost

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of the asset. All other borrowing costs are expensed in the period in which they occur in accordance with IAS 23: "Borrowing cost". Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds.

Recognition

GHAIL capitalises borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset as part of the cost of that asset. GHAIL recognises other borrowing costs as an expense in the period in which it incurs them.

Borrowing costs eligible for capitalisation

The borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset are those borrowing costs that would have been avoided if the expenditure on the qualifying asset had not been made.

To the extent that GHAIL borrows funds specifically for the purpose of obtaining a qualifying asset, GHAIL determines the amount of borrowing costs eligible for capitalisation as the actual borrowing costs incurred on that borrowing during the period less any investment income on the temporary investment of those borrowings

Commencement of capitalisation

GHAIL begins capitalising borrowing costs as part of the cost of a qualifying asset on the commencement date. The commencement date for capitalisation is the date when the GHAIL first meets all of the following conditions:

- it incurs expenditures for the asset;
- it incurs borrowing costs; and
- it undertakes activities that are necessary to prepare the asset for its intended use or sale.

Cessation of capitalisation

GHAIL ceases capitalising borrowing costs when substantially all the activities necessary to prepare the qualifying asset for its intended use or sale are complete.

3.8 Financial Instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Classification

The Group classifies its financial instruments as financial assets, financial liabilities and equity instruments.

Financial assets

Financial assets are classified into the following categories: financial assets at fair value through profit or loss, held-to-maturity investments, loans and receivables and available-for sale financial assets.

Financial assets at fair value through profit or loss

A financial asset is classified as fair value through profit or loss if it is classified as held-for-trading or upon initial recognition it is designated by the entity as at fair value through profit or loss.

Held-to-maturity investments

Held-to-maturity investments are non-derivative financial assets with fixed or determinable payments and fixed maturity that entity has the positive intent and ability to hold to maturity.

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed and determinable payments that are not quoted in the active market other than held to maturity investments, available for sale financial assets and loans and receivables.

Available-for-sale financial assets

Available-for-sale financial assets are non-derivative financial assets that are designated as available-for-sale or are not classified in any of the above categories of financial assets.

Financial liabilities

Financial liabilities are classified into the following categories: financial liabilities at fair value through profit or loss and other financial liabilities.

Financial liabilities at fair value through profit or loss

A financial liability is classified as fair value through profit or loss if it is classified as held-for-trading or upon initial recognition it is designated by the entity as at fair value through profit or loss.

Other financial liabilities

Other financial liabilities include bank overdrafts, short-term and long-term loans.

Recognition of financial asset and liability

A financial asset or a financial liability is recognised by GHAIL in its statement of financial position when GHAIL becomes a party to the contractual provisions of the financial asset or financial liability.

Derecognition of financial asset and liability

A financial asset or financial liability is derecognised; that is, removed, from GHAIL's statement of financial position, when GHAIL ceases to be a party to the financial instruments contractual provisions.

Initial measurement

Financial instruments is measured at the fair value of the consideration given or received (ie cost) plus (in most cases) transaction costs that are directly attributable to the acquisition or issue of the financial instrument. The exception to this rule is where a financial instrument is at fair value through profit or loss. In this case transaction costs are immediately recognised in profit or loss.

Transaction costs

Transaction costs are defined as the incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or liability. Transaction costs should be added to the initial fair value except for financial assets and financial liabilities classified as at fair value through profit or loss where they should be recognised in profit or loss. For financial liabilities, directly related costs of issuing debt is deducted from the amount of debt initially recognised.

Subsequent measurement of financial assets

After initial recognition loans and receivables and held-to-maturity (HTM) investments should be remeasured at amortised cost using the effective interest method. Certain investments in equity instruments should be measured at cost. These are equity investments that do not have a quoted market price in an active market and whose fair value cannot be reliably measured. All other financial assets should be remeasured to fair value, without any deduction for transaction costs that may be incurred on sale or other disposal. Gains and losses on remeasurement should be recognised as follows:

- Changes in the carrying amount of financial assets at fair value through profit or loss should be recognised in profit or loss.
- Changes in the carrying amount of loans and receivables and HTM investments should be recognised in profit or loss. Changes arise when these financial assets are derecognised or impaired and through the amortisation process.
- In respect of available for sale financial assets:

- Impairment losses and foreign exchange differences should be recognised in profit or loss.
- Interest on an interest-bearing asset should be calculated using the effective interest method and recognised in profit or loss.
- All other gains and losses should be recognised in other comprehensive income and held in a separate component in equity. On derecognition, either through sale or impairment, gains and losses previously recognised in other comprehensive income should be reclassified to profit or loss, becoming part of the gain or loss on derecognition.

Subsequent measurement of financial liabilities

Financial liabilities at fair value through profit or loss should be remeasured at fair value, excluding disposal costs, and any change in fair value should be recognised in profit or loss. All other financial liabilities should be remeasured at amortised cost using the effective interest method. Where a liability is carried at amortised cost, a gain or loss is recognised in profit or loss when the financial liability is derecognised or through the amortisation process.

Impairment

At each period end, an entity should assess whether there is any objective evidence that a financial asset or group of assets is impaired. Where there is objective evidence of impairment, the entity should determine the amount of any impairment loss.

Financial assets at fair value through profit or loss

No special impairment tests need to be carried out for such assets, because they are measured at fair value and all changes in fair value are recognised in profit or loss.

Financial assets carried at amortised cost

The impairment loss is the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses which have not been incurred) discounted at the financial instrument's original effective interest rate. Note that it is the original rate of interest which is used. Using market rates current at the time of the impairment would result in a fair value approach being adopted for the measurement of financial assets carried at amortised cost. The amount of the loss should be recognised in profit or loss.

Financial assets carried at cost

The impairment loss on unquoted equity instruments carried at cost is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the current market rate of return for a similar financial instrument. Such impairment losses should not be reversed.

Available-for-sale financial assets

Because available-for-sale financial assets are carried at fair value with gains and losses recognised in other comprehensive income, short-term falls in fair value will result in debits to other comprehensive income and potentially a debit balance held in equity in respect of an individual asset. If the asset is subsequently determined to be impaired, the loss previously recognised in other comprehensive income should be reclassified to profit or loss, even though the asset has not been derecognised. The impairment loss to be reclassified is the difference between the acquisition cost (net of any principal repayment and amortisation) and current fair value, less any impairment loss on that asset previously recognised in profit or loss. Impairment losses relating to such equity instruments should not be reversed. Impairment losses relating to such debt instruments should be reversed through profit or loss if, in a later period, the fair value of the instrument increases and the increase can be objectively related to an event occurring after the loss was recognised.

3.9 Inventories Measurement

Inventories are measured at the lower of cost and net realizable value.

Cost of inventories

The cost of inventories are comprise all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

Cost formulas

The cost of inventories is assigned by using the first-in, first-out (FIFO) cost formula. GHAIL shall use the same cost formula for all inventories having a similar nature and use to the entity.

The FIFO formula assumes that the items of inventory that were purchased or produced first are sold first, and consequently the items remaining in inventory at the end of the period are those most recently purchased or produced.

Recognition as an expense

When inventories are sold, the carrying amount of those inventories is recognised as an expense in the period in which the related revenue is recognised. The amount of any write-down of inventories to net realisable value and all losses of inventories is recognised as an expense in the period the write-down or loss occurs. The amount of any reversal of any write-down of inventories, arising from an increase in net realisable value, is recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

3.10 Trade and Other Receivables

Trade and other receivables are stated at their estimated realisable amounts inclusive of provisions for bad and doubtful debts

3.11 Cash and Cash Equivalents

Cash and cash equivalents consists of cash in hand and with banks on current deposit accounts and short term investments (FDR for the period of 1 to 3 months) which are held and available for use by the Group without any restriction. There is insignificant risk of change in value of the same.

3.12 Calculation of Recoverable Amount

The recoverable amount of an asset or cash-generating unit is the greater of its value in use and its fair value, less cost to sell. In assessing value in use, estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. A cash-generating unit is the smallest identifiable asset group that generates cash flows that are largely independent from other assets and groups.

3.13 Provisions, accruals and contingencies

Recognition

Provisions

A provision is recognised when:

- GHAIL has a present obligation (legal or constructive) as a result of a past event;
- it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation; and
- a reliable estimate can be made of the amount of the obligation.

If these conditions are not met, no provision is recognised.

Accruals

Accruals are liabilities to pay for goods or services that have been received or supplied but have not been paid, invoiced or formally agreed with the supplier, including amount due to employees.

Contingent Liabilities

GHAIL does not recognise a contingent liability. A contingent liability is disclosed, unless the possibility of an outflow of resources embodying economic benefits is remote.

Contingent Asset

GHAIL does not recognise a contingent asset. Contingent assets usually arise from unplanned or other unexpected events that give rise to the possibility of an inflow of economic benefits to GHAIL.

Measurement

The amount recognised as a provision is the best estimate of the expenditure required to settle the present obligation at the end of the reporting period.

Changes in provisions

Provisions is reviewed at the end of each reporting period and adjusted to reflect the current best estimate. If it is no longer probable that an outflow of resources embodying economic benefits will be required to settle the obligation, the provision is reversed.

Use of provisions

A provision is used only for expenditures for which the provision was originally recognised. Only expenditures that relate to the original provision are set against it. Setting expenditures against a provision that was originally recognised for another purpose would conceal the impact of two different events.

Future operating losses

Provisions are not recognised for future operating losses. Future operating losses do not meet the definition of a liability and the general recognition criteria set out for provisions.

3.14 Events Occurring after the Reporting Period

All material events after the statement of financial position date have been considered where appropriate; either adjustments have been made or adequately disclosed in the note no. 41.09 of Financial Statements.

3.15 Earnings Per Share (EPS)

Measurement

Basic EPS

GHAIL calculates basic earnings per share amounts for profit or loss attributable to ordinary equity holders of the parent entity.

Basic earnings per share has been calculated by dividing profit or loss attributable to ordinary equity holders of the parent entity (the numerator) by the weighted average number of ordinary shares outstanding (the denominator) during the period.

The Group's Diluted earnings per share is same as Basic earnings per share.

3.16 Dividend distribution on ordinary share

Dividend distribution to the Group's shareholders is recognised as a liability in the group's financial statements in the period in which the dividends are approved by the Group's shareholders

3.17 Income Statements

For the purpose of presentation of Income Statement, the function of expenses method is adopted, as it represents fairly the elements of the Group's performance

3.18 Revenue

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Group and the revenue can be reliably measured, regardless of when the payment is being made. Revenue is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms of payment and excluding taxes or duty.

The specific recognition criteria described below must also be met before revenue is recognized.

Income from sales

Revenue from the local sale of goods is recognised when the significant risks and rewards of ownership of the goods have passed to the buyer, usually on delivery of the goods.

Interest and other income

Interest and other income are recognised on accrual basis.

3.19 Expenses

All expenditure incurred in the running of the business and in maintaining the Property, Plant & Equipment in a state of efficiency is charged to revenue in arriving at the profit/(loss) for the period.

3.20 Finance Income and Expenses

Finance income comprises interest income on funds invested. Interest income is recognised as it accrues in profit or loss.

Finance costs comprise interest expense on borrowings, unwinding of the discount on provisions, changes in the fair value of financial assets at fair value through profit or loss, and losses on hedging instruments that are recognised in profit or loss. Borrowing costs that are not directly attributable to the acquisition, construction or production of a qualifying asset are recognised in profit or loss using the effective interest method.

The interest expense component of finance lease payments is allocated to each period during the lease term so as to produce a constant periodic rate of interest on the remaining balance of the liability.

3.21 Employee Benefits:

The company maintains provident fund for its eligible permanent employees. The eligibility is determined according to the terms and conditions set forth in the respective agreements/trust deeds.

The company has accounted for and disclosed employee benefits in compliance with the provision of IAS 19: Employee Benefits

The cost of employee benefit is charged off as revenue expenditure in the period to which the contributions relate.

3.22 Workers' Profit Participation Fund (WPPF)

The Group provides applicable rate of its profit before Tax after charging contribution to WPPF in accordance with the Bangladesh Labour Act, 2006 (Amended upto 2015).

3.23 Taxation

The tax expense for the period comprises current tax and deferred tax. Tax is recognized in the income statement, except in the case it relates to items recognized in other comprehensive income or directly in equity. In this case, the tax is also recognized in other comprehensive income or directly in equity.

Current tax

The current income tax charge is calculated based on tax laws enacted or substantively enacted at the balance sheet date. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

Deferred tax

Principle of recognition

Deferred tax is recognised as income or an expense amount within the tax charge, and included in the net profit or loss for the period.

Exceptions to recognition in profit or loss

Deferred tax relating to items dealt with as other comprehensive income (such as a revaluation) is recognised as tax relating to other comprehensive income within the statement of profit or loss and other comprehensive income.

Deferred tax relating to items dealt with directly in equity (such as the correction of an error or retrospective application of a change in accounting policy) is recognised directly in equity.

Deferred tax resulting from a business combination is included in the initial cost of goodwill.

Taxable temporary difference

A deferred tax liability is recognised for all taxable differences, except to the extent that the deferred tax liability arises from:

- the initial recognition of goodwill; or
- the initial recognition of an asset or liability in a transaction which is not a business combination; and at the time of the transaction, affects neither accounting profit nor taxable profit (tax loss).

Revaluations to fair value – property, plant and equipment

The revaluation does not affect taxable profits in the period of revaluation and consequently, the tax base of the asset is not adjusted. Hence a temporary difference arises. This is provided for in full based on the difference between carrying amount and tax base. An upward revaluation is therefore give rise to a deferred tax liability.

Non-depreciated revalued assets

If a deferred tax liability or deferred tax asset arises from a non-depreciable asset measured using the revaluation model in IAS 16, the measurement of the deferred tax liability or deferred tax asset shall reflect the tax consequences of recovering the carrying amount of the non-depreciable asset through sale, regardless of the basis of measuring the carrying amount of that asset. Accordingly, if the tax law specifies a tax rate applicable to the taxable amount derived from the sale of an asset that differs from the tax rate applicable to the taxable amount derived from using an asset, the former rate is applied in measuring the deferred tax liability or asset related to a non-depreciable asset.

Revaluations to fair value – other assets

IFRS permit or require certain other assets to be revalued to fair value, such as certain financial instruments and investment properties. If the revaluation is recognised in profit or loss (eg fair value through profit or loss instruments, investment properties) and the amount is taxable / allowable for tax, then no deferred tax arises as both the carrying value and the tax base are adjusted. However, if the revaluation is recognised as

other comprehensive income (eg available-for-sale instruments) and does not therefore impact taxable profits, then the tax base of the asset is not adjusted and deferred tax arises. This deferred tax is also recognised as other comprehensive income.

Deductible temporary difference

A deferred tax asset is recognised for all deductible temporary differences to the extent that it is probable that taxable profit will be available against which the deductible temporary difference can be utilised, unless the deferred tax asset arises from the initial recognition of an asset or liability in a transaction that:

- is not a business combination; and
- at the time of the transaction, affects neither accounting profit nor taxable profit (tax loss).

Unused tax losses and unused tax credits

A deferred tax asset is recognised for the carry forward of unused tax losses and unused tax credits to the extent that it is probable that future taxable profit will be available against which the unused tax losses and unused tax credits can be utilised.

3.24 Statement of Cash Flows

The Statement of Cash Flows has been prepared in accordance with the requirements of IAS 7: Statement of Cash Flows. The cash generating from operating activities has been reported using the Direct Method as prescribed by the Securities and Exchange Rules, 1987 and as the benchmark treatment of IAS 7 whereby major classes of gross cash receipts and gross cash payments from operating activities are disclosed.

3.24 Related Party Disclosures

The Group carried out a number of transactions with related parties. The information as required by BAS 24: "Related party Disclosure" has been disclosed in a separate notes to the accounts (Note-41.3).

3.25 Segment Reporting

Segmental information is provided for the different business segments of the Group. Business segmentation has been determined based on the nature of goods provided by the Group after considering the risk and rewards of each type of product.

Since the individual segments are located close to each other and operate in the same industrial environment, the need for geographical segmentation has no material impact.

The activities of the segments are described on notes 40 in the Notes to the Financial Statements. The group transfers products from one industry segment for use in another. Inter-segment transfers are based on fair market prices.

Revenue and expenses directly attributable to each segment are allocated to the respective segments. Revenue and expenses not directly attributable to a segment are allocated on the basis of their resource utilisation, wherever possible.

Assets and liabilities directly attributable to each segment are allocated to the respective segments. Assets and liabilities, which are not directly attributable to a segment, are allocated on a reasonable basis wherever possible.

Segment capital expenditure is the total cost incurred during the period to acquire segment assets that are expected to be used for more than one accounting period.

All operating segments' operating results are reviewed regularly to make decisions about resources to be allocated to the segment and assess its performance and for which discrete financial information is available.

4. Risk Exposure

4.1 Financial risk management

GHAIL's activities are exposed to a variety of financial risks. The Company's financial risk management centered upon using various tools and to manage exposure to risk, particularly credit risk, liquidity risk, market risk, currency risk and interest rate risk. Similar to general risk management, financial risk management requires identifying its sources, measuring it, and plans to address them. Taking risk is in the core of the financial business, and operational risk is an inevitable consequence of being in business. GHAIL's aim is therefore to achieve an appropriate balance between risk and return and minimize potential adverse effects on GHAIL's financial performance.

GHAIL's risk management policies are designed to identify and analyze these risks, to set appropriate risk limits and controls, and to monitor the risks and adhere to limits by means of prudent risk management policies and application of reliable and up-to-date information systems. GHAIL regularly reviews its risk management policies and systems to reflect changes in products, markets, and emerging best practices.

4.2 Credit risk

Credit risk is the risk that counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The senior management of GHAIL carefully manages its exposure to credit risk. Credit exposures arise principally in receivables from customers' existing in GHAIL's asset portfolio. The credit risk management and control are controlled through the credit policies of GHAIL's which are updated regularly. The company is also exposed to other credit risks arising from balances with banks which are controlled through board approved counterparty limits.

4.3 Liquidity risk

Liquidity risk is defined as the risk that the Company will not be able to settle or meet its obligations on time or at a reasonable price.

The Company's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient cash balances or liquid and marketable assets to meet its liabilities when fall due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation. Typically, management ensures that it has sufficient cash and cash equivalent to meet expected operational expenses, including the servicing of financial obligation through preparation of the cash forecast, prepared based on time line of payment of the financial obligation and accordingly arrange for sufficient liquidity/fund to make the expected payment within due date.

4.4 Industry Risks

Industry risk refers to the risk of increased competition from foreign and domestic sources leading to lower prices, revenues, profit margin, and market share which could have an adverse impact on the business, financial condition and results of operation. Frozen foods industry in Bangladesh is an emerging sector with vast local demand for its different product lines. Locally produced frozen products now play a significant role in this sector, which has been dominated by imports in the past.

However, the infrastructure required for this industry is inadequate in Bangladesh, as can be noted below:

- No organized collection centers for agricultural produce exist in Bangladesh; as a result, there is a high fluctuation in prices both for the growers and for processors.
- Absence of Cold Storage or Cold Chains although the whole process of collection, processing and distribution depends on cold temperature maintenance due to the nature of the finished product.

Golden Harvest Agro Industries Ltd has established its brand name in Frozen Food market with its quality products, range of products and customer services. However, to develop an infrastructure, both public and private sector participation is required. This is the focal point of Golden Harvest's future expansion plans. To

eliminate fluctuation in prices both for the growers and for the processors, Golden Harvest will organize collection centers to eliminate intermediary cost for both the parties. Deploying 15,000 refrigerators with 24 cold storages at -30 degree Celsius nationwide, Golden Harvest will have infrastructure backbone of Cold Chain which will ensure proper supply of Frozen Foods all over the country through its 50 temperature controlled transport.

4.5 Market risk

Market risk is the risk that any change in market prices, such as foreign exchange rates and interest rates will affect the Company's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return.

(i) Currency risk

The company is not exposed to currency risk on revenues because goods are sold in local market with local currency and there is insignificant purchase of machineries, parts and equipment.

(ii) Interest rate risk

Interest rate risk is the risk that the future cash flows of a financial instrument will fluctuate because of changes in market interest rates. GHAIL again has limited exposure to interest rate since it borrows primarily in fixed interest rate, and further, interest rate are fully hedged at project levels too.

4.6 Reporting foreign currency transactions

Initial recognition

A foreign currency transaction is recorded, on initial recognition in the functional currency, by applying to the foreign currency amount the spot exchange rate between the functional currency and the foreign currency at the date of the transaction.

Subsequent measurement

A foreign currency transaction may give rise to assets or liabilities that are denominated in a foreign currency. These assets and liabilities is translated into GHAIL's functional currency at each reporting date. However, translation depends on whether the assets or liabilities are monetary or non-monetary items:

Monetary items

Foreign currency monetary items outstanding at the end of the reporting date are translated using the closing rate. The difference between this amount and the previous carrying amount in functional currency is an exchange gain or loss.

Exchange differences arising on the settlement of monetary items or on translating monetary items at rates different from those at which they were translated on initial recognition during the period or in previous financial statements is recognised in profit or loss in the period in which they arise.

Non-monetary items

Non-monetary items carried at historic cost are translated using the exchange rate at the date of the transaction when the asset arose (historical rate). They are not subsequently retranslated in the individual financial statements of GHAIL. Non-monetary items carried at fair value are translated using the exchange rate at the date when the fair value was determined. The foreign currency fair value of a non-monetary asset is determined.

When a gain or loss on a non-monetary item is recognised in other comprehensive income, any exchange component of that gain or loss is recognised in other comprehensive income. Conversely, when a gain or loss

on a non-monetary item is recognised in profit or loss, any exchange component of that gain or loss is recognised in profit or loss.

Measurement of financial assets

Financial assets can be monetary or non-monetary and may be carried at fair value or amortised cost. Where a financial instrument is denominated in a foreign currency, it is initially recognised at fair value in the foreign currency and translated into the functional currency at spot rate. The fair value of the financial instrument is usually the same fair value of the consideration given in the case of an asset or received in the case of a liability.

At each period end, the foreign currency amount of financial instruments carried at amortised cost is translated into the functional currency using either the closing rate (if it is a monetary item) or the historical rate (if it is a non-monetary item). Financial instruments carried at fair value are translated to the functional currency using the closing spot rate.

Exchange differences

The entire change in the carrying amount of a non-monetary available-for-sale financial asset, including the effect of changes in foreign currency rates, is reported as other comprehensive income at the reporting date.

A change in the carrying amount of monetary available-for-sale financial assets on subsequent measurements is analysed between the foreign exchange component and the fair value movement. The foreign exchange component is recognised in profit or loss and the fair value movement is recognised as other comprehensive income.

The entire change in the carrying amount of financial instruments measured at fair value through profit or loss, including the effect of changes in foreign currency rates, is recognised in profit or loss.

AUDITOR'S REPORT TO THE SHAREHOLDERS
Of
The Shareholders of Golden Harvest Ice Cream Limited

We have audited the accompanying Financial Statements of Golden Harvest Ice Cream Limited, which comprise the Statement of Financial Position as at 30 September 2018, and the Statement of Profit or Loss and Other Comprehensive Income, Statement of Changes in Equity and Statement of Cash Flows for the period then ended and a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Financial Statements:

Management is responsible for the preparation and fair presentation of these financial statements in accordance with International Financial Reporting Standards (IFRS), the Companies Act, 1994, the Securities Exchange Rules, 1987 and other applicable laws and regulations and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility:

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing (ISA). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of all material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion:

In our opinion, the Financial Statements give a true and fair view of the Financial Position of Golden Harvest Ice Cream Limited as at 30 September 2018 and of the result of its operations and its cash flows for the period then ended in accordance with International Financial Reporting Standards (IFRS), the Companies Act, 1994, the Securities Exchange Rules, 1987 and other applicable laws and regulations.

We also report that:

- (a) we have obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit and made due verification thereof;
- (b) in our opinion, proper books of account as required by law have been kept by the company so far as it appeared from our examination of those books;
- (c) the company's statement of financial position and statement of comprehensive income dealt with by the report are in agreement with the books of account and returns; and the expenditures incurred were for the company's business.

Golden Harvest Ice Cream Limited
Notes to the Financial Statements
For the period ended 30 September 2018

1. Reporting entity

1.1 Company profile

Legal status of the company

Golden Harvest Ice Cream Limited formerly known as Golden Harvest Sea Food and Fish Processing Limited was incorporated on January 05, 2005, vide Reg. No.-C-55601(2285)/05 under the Companies Act, 1994 as a Private Limited Company.

Golden Harvest Sea Food and Fish Processing Limited' (GHSFFPL), has been converted into Golden Harvest Ice Cream Limited (**GHICL**) on 16th May 2013 through the office of Registrar of Joint Stock Companies and Firms.

Address of registered office and principal place of business:

The principal place of business and the registered office of the Company is at SPL Western Tower, Level # 5, Space Code # 502, 186, Gulshan-Tejgaon Link Road, Tejgaon Industrial Area, Dhaka-1208. The factory is located at Bokran, Monipur, Babanipur, GazipurSadar, Gazipur.

Nature of business activities

The company is engaged in manufacturing and marketing Ice cream and Dairy based products. The company also maintaining cold chain network to distribute frozen product. It has started commercial production of Ice cream.

1.2 Date of Authorization for issue

The financial statements of Golden Harvest Ice Cream Limited for the period ended 30 September 2018 were authorized for issue in accordance with a resolution of the Board of Directors on 27 December 2018.

1.3 Reporting Period

The reporting period of the Company covers 1st quarter from 1st July 2018 to 30th September 2018.

2.0 Basis of Preparation of Financial Statements

2.1 Statement on Compliance with Local Laws

The financial statements have been prepared in compliance with the requirements of the Companies Act, 1994, Securities and Exchange Rules, 1987 and other relevant local laws as applicable.

2.2 Statement on Compliance of Financial Reporting Standards

The financial statements have been prepared in accordance with International Accounting Standards (IAS) and International Financial Reporting Standards (IFRS).

2.3 Basis of Measurement of Elements of Financial Statements

Measurement is the process of determining the monetary amounts at which the elements of the financial statements are to be recognized and carried in the statement of financial position and profit or loss and other comprehensive income. The measurement basis adopted by Golden Harvest Ice Cream Limited is historical cost except for land, building and plant and machinery which are stated at revalued amount, inventories are at the lower of cost and net realizable value and marketable securities are at market value. Under the historical cost, assets are recorded at the amount of cash or cash equivalents paid or the fair value of the consideration given to acquire them at the time of their acquisition. Liabilities are recorded at the amount of proceeds received in exchange for the obligation, or in some circumstances (for example, income taxes), at the amounts of cash or cash equivalents expected to be paid to satisfy the liability in the normal course of business.

2.4 Going Concern

At each period end management of the Company makes assessment of going concern as required by IAS-1. The company has adequate resources to continue in operation for the foreseeable future and has wide coverage of its liabilities. For this reason, the directors continue to adopt going concern assumption while preparing the financial statements.

2.5 Accrual Basis of Accounting

GHICL prepares its financial statements, except for cash flow information, using the accrual basis of accounting. Since the accrual basis of accounting is used, GHICL recognizes items as assets, liabilities, equity, income and expenses (the elements of financial statements) when they satisfy the definitions and recognition criteria for those elements in the Framework.

2.6 Functional and presentation currency

The financial statements are prepared and presented in Bangladesh Taka/BDT, which is the Company's functional currency. The Company earns its major revenues in BDT and all other incomes/expenses and transactions are in BDT and the competitive forces and regulations of Bangladesh determine the sale prices of its goods and services. Further, the entire funds from financing activities are generated in BDT.

Foreign currency translation

Foreign currency transactions are booked in the functional currency of the Company at the exchange rate ruling on the date of transaction. Foreign currency monetary assets and liabilities are retranslated into the functional currency at rates of exchange at the balance sheet date. Exchange differences are included in the income statement.

2.7 Materiality and Aggregation

Each material class of similar items is presented separately in the Financial Statements. Items of a dissimilar nature or function are presented separately unless they are immaterial.

2.8 Offsetting

GHICL does not offset assets and liabilities or income and expenses, unless required or permitted by IFRS.

2.9 Comparative Information and Rearrangement thereof

Comparative information has where necessary been reclassified to conform to the current period's presentation. Comparative figures are restated as per requirement of IAS-8

2.10 Use of Estimates and Judgments

The preparation of financial statements in conformity with Bangladesh Financial Reporting Standards requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses and for contingent assets and liabilities that require disclosure, during and at the date of the financial statements.

Actual results may differ from these estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions of accounting estimates are recognized in the period in which the estimate is revised and in any future periods affected as required by IAS 8: "Accounting Policies, Changes in Accounting Estimates and Errors"

In particular, significant areas of estimation uncertainty and critical judgments in applying accounting policies that have the most significant effect on the amounts recognized in the financial statements include depreciation, amortization, impairment, net realizable value of inventories, accruals, taxation and provision.

2.11 Changes in Accounting Policies, Estimate and Errors

The effect of a change in an accounting estimate shall be recognised prospectively by including it in profit or loss in:

- (a) the period of the change, if the change affects that period only; or
- (b) the period of the change and future periods, if the change affects both.

To the extent that a change in an accounting estimate gives rise to changes in assets and liabilities, or relates to an item of equity, it shall be recognised by adjusting the carrying amount of the related asset, liability or equity item in the period of the change.

Changes in accounting policies and material prior period errors shall be retrospectively corrected in the first financial statements authorised for issue after their discovery by:

- (a) restating the comparative amounts for the prior period(s) presented in which the error occurred; or
- (b) if the error occurred before the earliest prior period presented, restating the opening balances of assets, liabilities and equity for the earliest prior period presented.

2.12 Structure, Content and Presentation of Financial Statements

Being the general-purpose financial statements, the presentation of these financial statements is in accordance with the guidelines provided by IAS 1: "Presentation of Financial Statements". A complete set of financial statements comprise:

- i) Statement of financial position as at 30 September 2018;
- ii) Statement of profit or loss and other comprehensive Income for the period ended 30 September 2018;
- iii) Statement of changes in equity for the period ended 30 September 2018;
- iv) Statement of cash flows for the period ended 30 September 2018; and
- v) Notes comprising a summary of significant accounting policies and other explanatory information to the accounts for the period ended 30 September 2018.

2.13 New accounting standards not yet adopted

Certain new accounting standards and interpretations have been published that are not mandatory for 30 September 2018 reporting periods and have not been early adopted by the Company.

a) IFRS 15: Revenue from Contracts with Customers

This standard is based on the principle that revenue is recognised when control of a good or service transfers to a customer, this notion of control replaces the existing notion of risks and rewards. The standard is mandatory for reporting periods commencing on or after 1 January 2018. The Company is currently assessing the implications and consequences of this standard.

b) IFRS 9: Financial Instruments

This standard addresses the classification, measurement and derecognition of financial assets and financial liabilities and introduces new rules for hedge accounting. The standard is mandatory for reporting periods commencing on or after 1 January 2018. The Company is currently assessing the implications and consequences of this standard.

3. Summary of Significant Accounting Policies

The accounting policies set out below are consistent with those used in the previous period. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Golden Harvest Ice Cream Limited.

3.1 Property, plant and equipment

Initial recognition and measurement

An item shall be recognized as property, plant and equipment if, and only if, it is probable that future economic benefits associated with the item will flow to the entity, and the cost of the item can be measured reliably.

Property, plant and equipment are initially recognized at cost and subsequently land & land development, buildings & other constructions and plant & machineries are stated at fair value. The property, plant and equipment are presented at cost/fair value, net of accumulated depreciation and/or accumulated impairment losses, if any. The cost of an item of property, plant and equipment comprises its purchase price, import duties and non-refundable taxes, after deducting trade discount and rebates, and any costs directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the intended manner. The cost also includes the cost of replacing part of the property, plant and equipment and borrowing costs for long-term debt availed for the construction/implementation of the PPE, if the recognition criteria are met.

Subsequent costs

The cost of replacing part of an item of property, plant and equipment is recognised in the carrying amount of an item if it is probable that the future economic benefits embodied within the part will flow to the GHICL and its cost can be measured reliably. The costs of the day-to-day servicing of property, plant and equipment are recognised in the profit and loss account as 'repair and maintenance' when it is incurred.

Subsequent measurement

Property, Plant and equipment are disclosed at cost less accumulated depreciation consistently over periods. On 30 June 2009, 30 June 2011 and 30 June 2013. Land and Land Developments, Building and other constructions and Plant and Machinery have been revalued to reflect fair value (prevailing market price) thereof following "Current Cost Method".

Depreciation on property, plant and equipment

Depreciation is provided to amortize the cost or valuation of the assets after commissioning, over the period of their expected useful lives, in accordance with the provisions of IAS 16: Property, Plant and Equipment. Depreciation of an asset begins when it is available for use, i.e. when it is in the location and condition necessary for it to be capable of operating in the manner intended by management. Depreciation is charged on all Property, Plant and Equipment except land and land developments on reducing balance method at the following rates:

Particular of Assets	Rate of Depreciation
Buildings and other constructions	2.5%
Plant & Machinery	5%
Office Equipment	10%
Furniture and Fixtures	10%
Vehicle	10%
Freezer	10%

Revaluation of property, plant and equipment of Golden Harvest Ice Cream Limited

The GHICL made revaluation of the GHICL's Land and Land developments and Plant and Machinery as of 30 June 2009, 30 June 2011 and 30 June 2013 to reflect fair value thereof in terms of Depreciated current cost thereof.

The increase in the carrying amount of revalued assets is recognized in other comprehensive income under the head Revaluation Surplus. Other Fixed Assets were kept outside the scope of revaluation works. These are expected to be realizable at written down value (WDV) thereof mentioned in the statement of financial position of the GHICL.

3.2 Capital work-in-progress:

Capital work in progress represents the cost incurred for acquisition and construction of items of property, plant and equipment that were not ready for use at the end of 30 September 2018 and these were stated at cost. In case of import components, capital work in progress is recognised when risks and rewards associated with such assets are transferred to the GHICL, i.e. at the time of shipment is confirmed by the supplier.

3.3 Intangible Assets

Recognition

The recognition of an item as an intangible asset requires GHICL to demonstrate that the item meets the definition of an intangible asset and the recognition criteria. An intangible asset is recognized as an asset if, and only if it is probable that expected future economic benefits that are attributable to the asset will flow to GHICL and the cost of the item can be measured reliably.

Measurement

An intangible asset is measure at cost less any accumulated amortisations and any accumulated impairment losses. Expenditure incurred after the initial recognition of an acquired intangible asset or after completion of an internally generated intangible asset is usually recognised in profit or loss as incurred. This is because such expenditure cannot be distinguished from expenditure to develop the business as a whole.

Separately acquired intangibles

The cost of a separately acquired intangible asset comprises its purchase price, including import duties and non-refundable purchase taxes, after deducting trade discounts and rebates; and any directly attributable cost of preparing the asset for its intended use.

Internally generated intangible assets

The cost of an internally generated intangible asset is the sum of expenditure incurred from the date when the intangible asset first meets the recognition criteria. The cost of an internally generated intangible asset comprises all directly attributable costs necessary to create, produce, and prepare the asset to be capable of operating in the manner intended by management.

Research Phase

No intangible asset arising from research (or from the research phase of an internal project) is recognised. Expenditure on research (or on the research phase of an internal project) is recognised as an expense when it is incurred.

Development Phase

An intangible asset arising from development (or from the development phase of an internal project) is recognised in accordance with IAS-38, "Intangible assets". The GHICL's intangible assets include computer software development (ERP), Design, construction and development of products, Augmented Reality. Internally generated brands, mastheads, publishing titles, customer lists and items similar in substance are not recognised as intangible assets.

Recognition of an expense

In some cases, expenditure is incurred to provide future economic benefits to an entity, but no intangible asset or other asset is acquired or created that can be recognised. For example, expenditure on research is recognised as an expense when it is incurred, except when it is acquired as part of a business combination. Other examples of expenditure that is recognised as an expense when it is incurred include:

- expenditure on start-up activities i.e. start-up costs/ pre-operating cost.
- expenditure on training activities.
- expenditure on advertising and promotional activities.
- expenditure on relocating or reorganizing part or all of an entity.

Past expenses

Expenditure on an intangible item that was initially recognised as an expense is not recognised as part of the cost of an intangible asset at a later date.

Revaluation of intangibles

The revaluation model requires an intangible asset shall be carried at a revalued amount, being its fair value at the date of the revaluation less any subsequent accumulated amortization and any subsequent accumulated impairment losses. However, fair value shall be measured by reference to an active market. The revaluation model does not allow the revaluation of intangible assets that have not previously been recognised as assets; or the initial recognition of intangible assets at amounts other than cost.

Amortization

The depreciable amount of an intangible asset with a finite useful life shall be allocated on a systematic basis over its useful life. Amortisation begins when the asset is available for use, i.e. when it is in the location and condition necessary for it to be capable of operating in the manner intended by management. Amortisation ceases at the earlier of the date that the asset is classified as held for sale and the date that the asset is derecognised. An intangible asset with an indefinite useful life is not amortised. Amortisation of the intangible asset with a finite useful life is calculated using the reducing balance method to write down the cost of intangible assets to their residual values over their estimated useful lives as follows:

Particulars	Rate
Software (at development stage)	0%
Design, construction and development of products	10%
Augmented Reality	10%

Derecognition of intangible assets

The carrying amount of an item of intangible assets is de-recognised on disposal or when no future economic benefits are expected from its use or disposal. The gain or loss arising from the de-recognition of an item of intangible assets is included as other income in profit or loss when the item is de-recognised. When the revalued assets are disposed off, the respective revaluation surplus is transferred to retained earnings.

3.4 Impairment of Assets

Recognising and measuring impairment loss

If the recoverable amount of an asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. That reduction is an impairment loss. An impairment loss on a non-revalued asset is recognised in profit or loss. However, an impairment loss on a revalued asset is recognised in other comprehensive income to the extent that the impairment loss does not exceed the amount in the revaluation surplus for that same asset. Such an impairment loss on a revalued asset reduces the revaluation surplus for that asset.

GHICL assesses at the end of each reporting period whether there is any indication that an asset may be impaired. If any such indication exists, GHICL estimates the recoverable amount of the asset. Irrespective of whether there is any indication of impairment, GHICL tests:

- an intangible asset with an indefinite useful life or an intangible asset not yet available for use for impairment annually

3.5 Accounting for lease

Finance lease

Finance lease is a lease that transfers substantially all the risks and rewards incidental to ownership of an asset. Title may or may not eventually be transferred.

Initial recognition

At the commencement of the lease term, GHICL recognises finance leases as assets and liabilities in their statements of financial position at amounts equal to the fair value of the leased property or, if lower, the present value of the minimum lease payments, each determined at the inception of the lease. Any initial direct costs of the lessee are added to the amount recognised as an asset.

Subsequent measurement

Minimum lease payments are apportioned between the finance charge and the reduction of the outstanding liability. The finance charge is allocated to each period during the lease term so as to produce a constant periodic rate of interest on the remaining balance of the liability. Contingent rents are charged as expenses in the periods in which they are incurred.

A finance lease gives rise to depreciation expense for depreciable assets as well as finance expense for each accounting period. The depreciation policy for depreciable leased assets is consistent with that for depreciable assets that are owned, and the depreciation recognised is calculated in accordance with IAS 16 Property, Plant and Equipment and IAS 38 Intangible Assets. If there is no reasonable certainty that the lessee will obtain ownership by the end of the lease term, the asset is fully depreciated over the shorter of the lease term and its useful life.

Operating leases

Lease payments under an operating lease are recognised as an expense on a straight-line basis over the lease term unless another systematic basis is more representative of the time pattern of the user's benefit.

Applying the requirement of International Financial Reporting Interpretation (IFRI) 4: Determining whether an Arrangement contains a Lease, the Power Purchase Agreement (PPA) between the Company /GHICL units and BPDB/BREB can be said to contain a lease arrangement. This could be interpreted as resulting in the transfer of substantially all of the risks and rewards incidental to the ownership to the underlying assets (power plant) to the off taker (BPDB/BREB) who would effectively be the lessee. However, management concluded that the PPA does not transfer substantially all risks incidental to ownership as per the requirement of para 17 of IAS 17. As such, all these lease arrangements are considered as an operating lease.

3.6 Capitalization of borrowingcost

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are recognised as part of the cost of the asset. All other borrowing costs are expensed in the period in which they occur in accordance with IAS 23: "Borrowing cost". Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds.

Recognition

GHICLcapitalizes borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset as part of the cost of that asset. GHICLrecognises other borrowing costs as an expense in the period in which it incurs them.

Borrowing costs eligible for capitalisation

The borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset are those borrowing costs that would have been avoided if the expenditure on the qualifying asset had not been made.To the extent that GHICL borrows funds specifically for the purpose of obtaining a qualifying asset, GHICL determines the amount of borrowing costs eligible for capitalizations as the actual borrowing costs incurred on that borrowing during the period less any investment income on the temporary investment of those borrowings

3.7 Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Financial assets

Financial assets are classified into the following categories: financial assets at fair value through profit or loss, held-to-maturity investments, loans and receivables and available-for sale financial assets.

Financial assets at fair value through profit or loss

A financial asset is classified as fair value through profit or loss if it is classified as held-for-trading or upon initial recognition it is designated by the entity as at fair value through profit or loss.

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed and determinable payments that are not quoted in the active market other than held to maturity investments, available for sale financial assets and loans and receivables.

Financial liabilities

Financial liabilities are classified into the following categories: financial liabilities at fair value through profit or loss and other financial liabilities.

Financial liabilities at fair value through profit or loss

A financial liability is classified as fair value through profit or loss if it is classified as held-for-trading or upon initial recognition it is designated by the entity as at fair value through profit or loss.

Other financial liabilities

Other financial liabilities include bank overdrafts, short-term and long-term loans.

Recognition of financial asset and liability

A financial asset or a financial liability is recognised by GHICL in its statement of financial position when GHICL becomes a party to the contractual provisions of the financial asset or financial liability.

Derecognition of financial asset and liability

A financial asset or financial liability is derecognised; that is, removed, from GHICL's statement of financial position, when GHICL ceases to be a party to the financial instruments contractual provisions.

Impairment

At each period end, an entity should assess whether there is any objective evidence that a financial asset or GHICL of assets is impaired. Where there is objective evidence of impairment, the entity should determine the amount of any impairment loss.

Financial assets carried at amortized cost

The impairment loss is the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses which have not been incurred) discounted at the financial instrument's original effective interest rate. Note that it is the original rate of interest which is used. Using market rates current at the time of the impairment would result in a fair value approach being adopted for the measurement of financial assets carried at amortised cost. The amount of the loss should be recognised in profit or loss.

Financial assets carried at cost

The impairment loss on unquoted equity instruments carried at cost is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the current market rate of return for a similar financial instrument. Such impairment losses should not be reversed.

3.8 Inventories

Measurement

Inventories are measured at the lower of cost and net realizable value.

Cost of inventories

The cost of inventories are comprise all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition. The cost of inventories is assigned by using the first-in, first-out (FIFO) cost formula. GHICL shall use the same cost formula for all inventories having a similar nature and use to the entity.

Recognition as an expense

When inventories are sold, the carrying amount of those inventories is recognised as an expense in the period in which the related revenue is recognised. The amount of any write-down of inventories to net realisable value and all losses of inventories is recognised as an expense in the period the write-down or loss occurs. The amount of any reversal of any write-down of inventories, arising from an increase in net realisable value, is recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

3.9 Trade and other receivables

Trade and other receivables are stated at their estimated realisable amounts inclusive of provisions for bad and doubtful debts

3.10 Cash and cash equivalents

Cash and cash equivalents consist of cash in hand and with banks on current deposit accounts and short-term investments (FDR for the period of 1 to 3 months) which are held and available for use by the GHICL without any restriction. There is insignificant risk of change in value of the same.

3.11 Calculation of recoverable amount

The recoverable amount of an asset or cash-generating unit is the greater of its value in use and its fair value, less cost to sell. In assessing value in use, estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. A cash-generating unit is the smallest identifiable asset GHICL that generates cash flows that are largely independent from other assets and GHICLs.

3.12 Provisions, accruals and contingencies**Provisions**

A provision is recognised when GHICL has a present obligation (legal or constructive) as a result of a past event; and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation; and reliable estimate can be made of the amount of the obligation. If these conditions are not met, no provision is recognized.

Accruals

Accruals are liabilities to pay for goods or services that have been received or supplied but have not been paid, invoiced or formally agreed with the supplier, including amount due to employees.

Contingent liabilities

GHICL does not recognised a contingent liability. A contingent liability is disclosed, unless the possibility of an outflow of resources embodying economic benefits is remote.

Contingent asset

GHICL does not recognise a contingent asset. Contingent assets usually arise from unplanned or other unexpected events that give rise to the possibility of an inflow of economic benefits to GHICL.

Measurement

The amount recognised as a provision is the best estimate of the expenditure required to settle the present obligation at the end of the reporting period.

Changes and uses of provisions

Provisions are reviewed at the end of each reporting period and adjusted to reflect the current best estimate. If it is no longer probable that an outflow of resources embodying economic benefits will be required to settle the obligation, the provision is reversed. A provision is used only for expenditures for which the provision was originally recognised. Only expenditures that relate to the original provision are set against it. Setting expenditures against a provision that was originally recognised for another purpose would conceal the impact of two different events.

3.13 Events after the reporting period

Events after the reporting period are those events, favorable and unfavorable, that occur between the end of the reporting period and the date when the financial statements are authorized for issue. Two types of events can be identified: Adjusting Events: - those that provide evidence of conditions that existed at the end of the reporting period. Non-adjusting Events: - those that are indicative of conditions that arose after the reporting period. All material events after the statement of financial position date have been considered where appropriate; either adjustments have been made or adequately disclosed in the note no. 34.12 of Financial Statements.

3.14 Earnings Per Share (EPS)

Basic EPS

GHICL calculates basic earnings per share amounts for profit or loss attributable to ordinary equity holders of the parent entity. Basic earnings per share has been calculated by dividing profit or loss attributable to ordinary equity holders of the parent entity (the numerator) by the weighted average number of ordinary shares outstanding (the denominator) during the period.

GHICL presents basic earnings per share in the statement of profit or loss and other comprehensive income. The company presents basic earnings per share with equal prominence for all periods presented. GHICL presents basic earnings per share, even if the amounts are negative (i.e. a loss per share). The GHICL's Diluted earnings per share is same as Basic earnings per share.

3.15 Income statement

For the purpose of presentation of income statement, the function of expenses method is adopted, as it represents fairly the elements of the GHICL's performance.

3.16 Revenue

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the GHICL and the revenue can be reliably measured, regardless of when the payment is being made. Revenue is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms

of payment and excluding taxes or duty. The specific recognition criteria described below must also be met before revenue is recognized:

Income from sales

Revenue from the local sale of goods is recognised when the significant risks and rewards of ownership of the goods have passed to the buyer, usually on delivery of the goods.

Interest and other income

Interest and other income are recognised on accrual basis.

3.17 Expenses

All expenditure incurred in the running of the business and in maintaining the Property, Plant & Equipment in a state of efficiency is charged to revenue in arriving at the profit/(loss) for the period.

3.18 Employee benefits

The company maintains provident fund for its eligible permanent employees. The eligibility is determined according to the terms and conditions set forth in the respective agreements/trust deeds. The company has accounted for and disclosed employee benefits in compliance with the provision of IAS 19: "Employee Benefits". The cost of employee benefit is charged off as revenue expenditure in the period to which the contributions relate.

3.19 Workers' profit participation fund (WPPF)

The GHICL provides applicable rate of its profit before Tax after charging contribution to WPPF in accordance with the Bangladesh Labour Act, 2006.

3.20 Taxation

The tax expense for the period comprises current tax and deferred tax. Tax is recognized in the income statement, except in the case it relates to items recognized in other comprehensive income or directly in equity. In this case, the tax is also recognized in other comprehensive income or directly in equity.

Current tax

The current income tax charge is calculated based on tax laws enacted or substantively enacted at the balance sheet date. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

Deferred tax

Principle of recognition

Deferred tax is recognised as income or an expense amount within the tax charge, and included in the net profit or loss for the period. Deferred tax relating to items dealt with as other comprehensive income (such as a revaluation) is recognised as tax relating to other comprehensive income within the statement of profit or loss and other comprehensive income. Deferred tax relating to items dealt with directly in equity (such as the correction of an error or retrospective application of a change in accounting policy) is recognised directly in equity.

Taxable temporary difference

A deferred tax liability is recognised for all taxable differences, except to the extent that the deferred tax liability arises from the initial recognition of goodwill; or the initial recognition of an asset or liability in a transaction which is not a business combination; and at the time of the transaction, affects neither accounting profit nor taxable profit (tax loss).

Revaluations to fair value – property, plant and equipment

The revaluation does not affect taxable profits in the period of revaluation and consequently, the tax base of the asset is not adjusted. Hence a temporary difference arises. This is provided for in full based on the difference between carrying amount and tax base. An upward revaluation is therefore give rise to a deferred tax liability.

Non-depreciated revalued assets

Deferred tax is recognized even where non-current assets are not depreciated e.g. land. This is because the carrying value will ultimately be recovered on disposal. Deferred tax assets and liabilities and assets are measured considering the tax consequence of recovering the carrying amount of the non-depreciable assets i.e. the tax rate applicable to the taxable amount derived from the sale of an asset

Deductible temporary difference

A deferred tax asset is recognised for all deductible temporary differences to the extent that it is probable that taxable profit will be available against which the deductible temporary difference can be utilised, unless the deferred tax asset arises from the initial recognition of an asset or liability in a transaction that is not a business combination; and at the time of the transaction, affects neither accounting profit nor taxable profit (tax loss).

3.21 Statement of cash flows

The Statement of cash flows has been prepared in accordance with the requirements of IAS 7: Statement of Cash Flows. The cash generating from operating activities has been reported using the Direct Method as prescribed by the Securities and Exchange Rules, 1987 and as the benchmark treatment of IAS 7 whereby major classes of gross cash receipts and gross cash payments from operating activities are disclosed.

3.22 Related party disclosures

Relationships between a parent and its subsidiaries is disclosed irrespective of whether there have been transactions between them. GHICL discloses key management personnel compensation. The company discloses the nature of the related party relationship as well as information about those transactions and outstanding balances, including commitments, necessary for users to understand the potential effect of the relationship on the financial statements. The GHICL carried out a number of transactions with related parties. The information as required by IAS 24: "Related party Disclosure" has been disclosed in a separate notes to the accounts (Note-34.03).

3.23 Operating segment

An operating segment is a component of GHICL that engages in business activities from which it earns revenues and incur expenses and whose operating results are regularly reviewed by the GHICL's chief operating decision maker to make decisions about resources to be allocated to the segment and assess its performance, and for which discrete financial information is available.

Reportable segments

GHICL reports separately information about each operating segment that has been identified as an operating segment and exceeds the quantitative thresholds.

Segmental information is provided for the different business segments of the GHICL. Business segmentation has been determined based on the nature of goods provided by the GHICL after considering the risk and rewards of each type of product.

Since the individual segments are located close to each other and operate in the same industrial environment, the need for geographical segmentation has no material impact.

The activities of the segments are described on notes 34.09 in the Notes to the Financial Statements. The GHICL transfers products from one industry segment for use in another. Inter-segment transfers are based on fair market prices.

Revenue and expenses directly attributable to each segment are allocated to the respective segments. Revenue and expenses not directly attributable to a segment are allocated on the basis of their resource utilization, wherever possible.

Assets and liabilities directly attributable to each segment are allocated to the respective segments. Assets and liabilities, which are not directly attributable to a segment, are allocated on a reasonable basis wherever possible.

Segment capital expenditure is the total cost incurred during the period to acquire segment assets that are expected to be used for more than one accounting period.

All operating segments' operating results are reviewed regularly to make decisions about resources to be allocated to the segment and assess its performance and for which discrete financial information is available.

3.24 Reporting foreign currency transactions

Initial recognition

A foreign currency transaction is recorded, on initial recognition in the functional currency, by applying to the foreign currency amount the spot exchange rate between the functional currency and the foreign currency at the date of the transaction.

Subsequent measurement

A foreign currency transaction may give rise to assets or liabilities that are denominated in a foreign currency. These assets and liabilities is translated into GHICL's functional currency at each reporting date.

Monetary items

Foreign currency monetary items outstanding at the end of the reporting date are translated using the closing rate. The difference between this amount and the previous carrying amount in functional currency is an exchange gain or loss. Exchange differences arising on the settlement of monetary items or on translating monetary items at rates different from those at which they were translated on initial recognition during the period or in previous financial statements is recognised in profit or loss in the period in which they arise.

Non-monetary items

Non-monetary items carried at historic cost are translated using the exchange rate at the date of the transaction when the asset arose (historical rate). They are not subsequently retranslated in the individual financial statements of GHICL. Non-monetary items carried at fair value are translated using the exchange rate at the date when the fair value was determined. The foreign currency fair value of a non-monetary asset is determined. When a gain or loss on a non-monetary item is recognised in other comprehensive income, any exchange component of that gain or loss is recognised in other comprehensive income. Conversely, when a gain or loss on a non-monetary item is recognised in profit or loss, any exchange component of that gain or loss is recognised in profit or loss.

Financial assets

Financial assets can be monetary or non-monetary and may be carried at fair value or amortized cost. At each period end, the foreign currency amount of financial instruments carried at amortized cost is translated into the functional currency using either the closing rate (if it is a monetary item) or the historical rate (if it is a non-monetary item). Financial instruments carried at fair value are translated to the functional currency using the closing spot rate.

The entire change in the carrying amount of a non-monetary available-for-sale financial asset, including the effect of changes in foreign currency rates, is reported as other comprehensive income at the reporting date. A change in the carrying amount of monetary available-for-sale financial assets on subsequent measurements is analyzed between the foreign exchange component and the fair value movement. The foreign exchange component is recognised in profit or loss and the fair value movement is recognised as other comprehensive income. The entire change in the carrying amount of financial instruments measured at fair value through profit or loss, including the effect of changes in foreign currency rates, is recognised in profit or loss.

4. Risk exposure

4.1 Financial risk management

GHICL's activities are exposed to a variety of financial risks. The Company's financial risk management centered upon using various tools and to manage exposure to risk, particularly credit risk, liquidity risk, market risk, currency risk and interest rate risk. Similar to general risk management, financial risk management requires identifying its sources, measuring it, and plans to address them. Taking risk is in the core of the financial business, and operational risk is an inevitable consequence of being in business. GHICL's aim is therefore to achieve an appropriate balance between risk and return and minimize potential adverse effects on GHICL's financial performance.

GHICL's risk management policies are designed to identify and analyze these risks, to set appropriate risk limits and controls, and to monitor the risks and adhere to limits by means of prudent risk management policies and application of reliable and up-to-date information systems. GHICL regularly reviews its risk management policies and systems to reflect changes in products, markets, and emerging best practices.

4.2 Credit risk

Credit risk is the risk that counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The senior management of GHICL carefully manages its exposure to credit risk. Credit exposures arise principally in receivables from customers' existing in GHICL's asset portfolio. The credit risk management and control are controlled through the credit policies of GHICL's which are updated regularly. The company is also exposed to other credit risks arising from balances with banks which are controlled through board approved counterparty limits.

4.3 Liquidity risk

Liquidity risk is defined as the risk that the Company will not be able to settle or meet its obligations on time or at a reasonable price.

The Company's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient cash balances or liquid and marketable assets to meet its liabilities when fall due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation. Typically, management ensures that it has sufficient cash and cash equivalent to meet expected operational expenses, including the servicing of financial obligation through preparation of the cash forecast,

prepared based on time line of payment of the financial obligation and accordingly arrange for sufficient liquidity/fund to make the expected payment within due date.

4.4 Industry risks

Industry risk refers to the risk of increased competition from foreign and domestic sources leading to lower prices, revenues, profit margin, and market share which could have an adverse impact on the business, financial condition and results of operation. Frozen foods industry in Bangladesh is an emerging sector with vast local demand for its different product lines. Locally produced frozen products now play a significant role in this sector, which has been dominated by imports in the past.

However, the infrastructure required for this industry is inadequate in Bangladesh, as can be noted below:

- No organized collection centers for agricultural produce exist in Bangladesh; as a result, there is a high fluctuation in prices both for the growers and for processors.
- Absence of Cold Storage or Cold Chains although the whole process of collection, processing and distribution depends on cold temperature maintenance due to the nature of the finished product.

4.5 Market risk

Market risk is the risk that any change in market prices, such as foreign exchange rates and interest rates will affect the Company's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return.

(i) Currency risk

The company is not exposed to currency risk on revenues because goods are sold in local market with local currency and there is insignificant purchase of machineries, parts and equipment.

(ii) Interest rate risk

Interest rate risk is the risk that the future cash flows of a financial instrument will fluctuate because of changes in market interest rates. GHICL again has limited exposure to interest rate since it borrows primarily in fixed interest rate, and further, interest rate are fully hedged at project levels too.

5. Property, plant and equipment

**Independent Auditor's Report
to
The Shareholders of Golden Harvest Dairy Limited**

We have audited the accompanying financial statements of Golden Harvest Dairy Limited which comprise statement of financial position as at 30 September 2018 and the statement of profit or loss and other comprehensive income, statement of changes in equity and statement of cash flows and a summary of significant accounting policies and other explanatory notes.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards (IFRS) and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing (ISA). Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements of the group and the separate financial statements of the company give a true and fair view of the consolidated financial position of the group and the separate financial position of the company as at 30 September 2018, and of its consolidated and separate financial performance and its consolidated and separate cash flows for the period then ended in accordance with International Financial Reporting Standards (IFRSs) and comply with the Companies Act 1994, the Securities and Exchange Rules 1987 and other applicable laws and regulations.

We also report that:

- e) we have obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit and made due verification thereof;
- f) in our opinion, proper books of account as required by law have been kept by the company and its subsidiary so far as it appeared from our examination of these books;
- g) the consolidated statement of financial position and the statement of comprehensive income dealt with by the report are in agreement with the books of account; and
- h) the expenditure incurred was for the purposes of the company's business.

Golden Harvest Dairy Limited
Notes to the Financial Statements
For the period ended 30 September 2018

1. Reporting entity
1.2 Company profile

Legal status of the company

Golden Harvest Dairy Limited (GHDL) has incorporated on 18 February 2015; vide Reg. No.-C-121268/15 under the Companies Act, 1994 as a Private Limited Company.

Address of registered office and principal place of business:

The principal place of business and the registered office of the Company is at SPL Western Tower, Level # 5, and Space Code # 501 & 502, 186, Gulshan-Tejgaon Link Road, Tejgaon Industrial Area, Dhaka-1208. The factory is located at Golden Harvest Industrial Park, Goainghat, Sylhet.

Nature of business activities

The objectives of the company will process Liquid Milk and milk based product like butter, cream, cheese, yogurt, etc. The project will not be for milk collection only it will support in meat processing and calf selling.

1.2 Date of Authorization for issue

The financial statements of Golden Harvest Dairy Ltd. for the period ended 30 September 2018 were authorized for issue in accordance with a resolution of the Board of Directors on 26 December 2018.

1.3 Reporting Period

The reporting period of the Company covers 1st quarter from 1st July 2018 to 30th September 2018.

2. Basis of Preparation of Financial Statements

2.1 Statement on Compliance with Local Laws

The consolidated financial statements have been prepared in compliance with the requirements of the Companies Act, 1994, Securities and Exchange Rules, 1987 and other relevant local laws as applicable.

2.2 Statement on Compliance of Financial Reporting Standards

The consolidated financial statements have been prepared in accordance with International Accounting Standards (IAS) and International Financial Reporting Standards (IFRS).

2.3 Basis of Measurement of Elements of Financial Statements

Measurement is the process of determining the monetary amounts at which the elements of the financial statements are to be recognized and carried in the statement of financial position and profit or loss and other comprehensive income. The measurement basis adopted by historical cost except for land, building and plant and machinery which are stated at revalued amount, inventories are at the lower of cost and net realizable value and marketable securities are at market value. Under the historical cost, assets are recorded at the amount of cash or cash equivalents paid or the fair value of the consideration given to acquire them at the time of their acquisition. Liabilities are recorded at the amount of proceeds received in exchange for the

obligation, or in some circumstances (for example, income taxes), at the amounts of cash or cash equivalents expected to be paid to satisfy the liability in the normal course of business.

2.4 Going Concern

At each period end management of the Company makes assessment of going concern as required by IAS-1. The company has adequate resources to continue in operation for the foreseeable future and has wide coverage of its liabilities. For this reason, the directors continue to adopt going concern assumption while preparing the financial statements.

2.5 Accrual Basis of Accounting

GHDL prepares its financial statements, except for cash flow information, using the accrual basis of accounting. Since the accrual basis of accounting is used, GHDL recognizes items as assets, liabilities, equity, income and expenses (the elements of financial statements) when they satisfy the definitions and recognition criteria for those elements in the Framework.

2.6 Functional and presentation currency

The financial statements are prepared and presented in Bangladesh Taka/BDT, which is the Company's functional currency. The Company earns its major revenues in BDT and all other incomes/expenses and transactions are in BDT and the competitive forces and regulations of Bangladesh determine the sale prices of its goods and services. Further, the entire funds from financing activities are generated in BDT.

Foreign currency translation

Foreign currency transactions are booked in the functional currency of the Company at the exchange rate ruling on the date of transaction. Foreign currency monetary assets and liabilities are retranslated into the functional currency at rates of exchange at the balance sheet date. Exchange differences are included in the income statement.

2.7 Materiality and Aggregation

Each material class of similar items is presented separately in the Financial Statements. Items of a dissimilar nature or function are presented separately unless they are immaterial.

2.8 Offsetting

GHDL does not offset assets and liabilities or income and expenses, unless required or permitted by a IFRS.

2.9 Comparative Information and Rearrangement thereof

Comparative information has where necessary been reclassified to conform to the current period's presentation. Comparative figures are restated as per requirement of IAS-8.

2.10 Use of Estimates and Judgments

The preparation of consolidated financial statements in conformity with Bangladesh Financial Reporting Standards requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses and for contingent assets and liabilities that require disclosure, during and at the date of the financial statements.

Actual results may differ from these estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions of accounting estimates are recognized in the period in which the estimate is revised and in any future periods affected as required by IAS 8: "Accounting Policies, Changes in Accounting Estimates and Errors"

In particular, significant areas of estimation uncertainty and critical judgments in applying accounting policies that have the most significant effect on the amounts recognized in the financial statements include depreciation, amortization, impairment, net realizable value of inventories, accruals, taxation and provision.

2.11 Changes in Accounting Policies, Estimate and Errors

The effect of a change in an accounting estimate shall be recognised prospectively by including it in profit or loss in:

- (a) the period of the change, if the change affects that period only; or
- (b) the period of the change and future periods, if the change affects both.

To the extent that a change in an accounting estimate gives rise to changes in assets and liabilities, or relates to an item of equity, it shall be recognised by adjusting the carrying amount of the related asset, liability or equity item in the period of the change.

Changes in accounting policies and material prior period errors shall be retrospectively corrected in the first financial statements authorised for issue after their discovery by:

- (a) restating the comparative amounts for the prior period(s) presented in which the error occurred; or
- (b) if the error occurred before the earliest prior period presented, restating the opening balances of assets, liabilities and equity for the earliest prior period presented.

2.12 Structure, Content and Presentation of Financial Statements

Being the general purpose financial statements, the presentation of these financial statements is in accordance with the guidelines provided by IAS 1: "Presentation of Financial Statements". A complete set of financial statements comprise:

- vi) Statement of financial position as at 30 September 2018;
- vii) Statement of profit or loss and other comprehensive Income for the period ended 30 September 2018;
- viii) Statement of changes in equity for the period ended 30 September 2018;
- ix) Statement of cash flows for the period ended 30 September 2018; and
- x) Notes comprising a summary of significant accounting policies and other explanatory information to the accounts for the period ended 30 September 2018.

3. Summary of Significant Accounting Policies

The accounting policies set out below are consistent with those used in the previous period. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Golden Harvest Dairy Limited.

3.1 Property, Plant and Equipment

Initial Recognition and Measurement

An item shall be recognized as property, plant and equipment if, and only if, it is probable that future economic benefits associated with the item will flow to the entity, and the cost of the item can be measured reliably IAS 16.

Property, plant and equipment are initially recognized at cost and subsequently land, buildings & civil constructions and plant & machineries are stated at fair value. The property, plant and equipment are presented at cost/fair value, net of accumulated depreciation and/or accumulated impairment losses, if any.

The cost of an item of property, plant and equipment comprises its purchase price, import duties and non-refundable taxes, after deducting trade discount and rebates, and any costs directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the intended manner. The cost also includes the cost of replacing part of the property, plant and equipment and borrowing costs for long-term debt availed for the construction/ Implementation of the PPE, if the recognition criteria are met.

Subsequent costs

The cost of replacing part of an item of property, plant and equipment is recognised in the carrying amount of an item if it is probable that the future economic benefits embodied within the part will flow to the Group and its cost can be measured reliably. The costs of the day-to-day servicing of property, plant and equipment are recognised in the profit and loss account as 'Repair & Maintenance' when it is incurred.

Subsequent Measurement

Property, Plant and equipment are disclosed at cost less accumulated depreciation consistently over periods. On 30 June 2009, 30 June 2011 and 30 June 2013. Land and Land Developments, Building and other constructions and Plant and Machinery have been revalued to reflect fair value (prevailing market price) thereof following "Current Cost Method".

Depreciation on Property, Plant and Equipment

Depreciation is provided to amortize the cost or valuation of the assets after commissioning, over the period of their expected useful lives, in accordance with the provisions of IAS 16: Property Plant and Equipment. Depreciation of an asset begins when it is available for use, i.e. when it is in the location and condition necessary for it to be capable of operating in the manner intended by management. Depreciation is charged on all Property, Plant and Equipment except land and land developments on reducing balance method at the following rates:

Particular of Assets	Rate of Depreciation
Buildings and other constructions	2.5%
Plant & Machinery	5%
Office Equipment	10%
Furniture and Fixtures	10%
Vehicle	10%

3.2 Capital work-in-progress:

Capital work in progress represents the cost incurred for acquisition and construction of items of property, plant and equipment that were not ready for use at the end of 30 September 2018 and these were stated at cost. In case of import components, capital work in progress is recognised when risks and rewards associated with such assets are transferred to the Company, i.e. at the time of shipment is confirmed by the supplier.

3.3 Biological Asset

Recognition and measurement

Biological asset is a living plant or animal. Biological asset are measured at fair value less costs to sell, both on initial recognition and each reporting date. Cost to sell includes sale commission and regulatory levies but exclude transport to market. Transport costs are in fact deducted from market value in order to reach fair value. The gain on initial recognition and from a change in this value is recognized in profit or loss. The interest on the loan taken out to finance the acquisition is not a cost to sell. The milk is agriculture product and is recognized initially under IAS-41 at fair value less cost to sell. (at this point it is taken into inventories and dealt with under IAS-2). The gain on initial recognition should be recognised in profit or loss.

3.4 Impairment of Assets

Recognising and measuring impairment loss

If the recoverable amount of an asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. That reduction is an impairment loss. An impairment loss on a non-revalued asset is recognised in profit or loss. However, an impairment loss on a revalued asset is recognised in other comprehensive income to the extent that the impairment loss does not exceed the amount in the revaluation surplus for that same asset. Such an impairment loss on a revalued asset reduces the revaluation surplus for that asset.

GHDL assesses at the end of each reporting period whether there is any indication that an asset may be impaired. If any such indication exists, GHDL estimate the recoverable amount of the asset. Irrespective of whether there is any indication of impairment, GHDL tests:

- an intangible asset with an indefinite useful life or an intangible asset not yet available for use for impairment annually

3.5 Accounting for lease

Finance lease

Finance lease is a lease that transfers substantially all the risks and rewards incidental to ownership of an asset. Title may or may not eventually be transferred.

Initial recognition

At the commencement of the lease term, GHDL recognises finance leases as assets and liabilities in their statements of financial position at amounts equal to the fair value of the leased property or, if lower, the present value of the minimum lease payments, each determined at the inception of the lease. Any initial direct costs of the lessee are added to the amount recognised as an asset.

Subsequent measurement

Minimum lease payments are apportioned between the finance charge and the reduction of the outstanding liability. The finance charge is allocated to each period during the lease term so as to produce a constant periodic rate of interest on the remaining balance of the liability. Contingent rents are charged as expenses in the periods in which they are incurred.

A finance lease gives rise to depreciation expense for depreciable assets as well as finance expense for each accounting period. The depreciation policy for depreciable leased assets is consistent with that for depreciable assets that are owned, and the depreciation recognised is calculated in accordance with IAS 16 Property, Plant and Equipment and IAS 38 Intangible Assets. If there is no reasonable certainty that the lessee will obtain ownership by the end of the lease term, the asset is fully depreciated over the shorter of the lease term and its useful life.

Operating leases

Lease payments under an operating lease are recognised as an expense on a straight-line basis over the lease term unless another systematic basis is more representative of the time pattern of the user's benefit.

Applying the requirement of Bangladesh Financial Reporting Interpretation (BFRI) 4: Determining whether an Arrangement contains a Lease, the Power Purchase Agreement (PPA) between the Company /Group units and BPDB/BREB can be said to contain a lease arrangement. This could be interpreted as resulting in the transfer of substantially the entire risks and rewards incidental to the ownership to the underlying assets (power plant) to the off taker (BPDB/BREB) who would effectively be the lessee. However, management concluded that the PPA does not transfer substantially all risks incidental to ownership as per the requirement of para 17 of IAS 17. As such, all these lease arrangements are considered as an operating lease.

3.6 Capitalisation of Borrowing Cost

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of the asset. All other borrowing costs are expensed in the period in which they occur in accordance with IAS 23: "Borrowing cost". Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds.

Recognition

GHDL capitalises borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset as part of the cost of that asset. GHDL recognises other borrowing costs as an expense in the period in which it incurs them.

Borrowing costs eligible for capitalisation

The borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset are those borrowing costs that would have been avoided if the expenditure on the qualifying asset had not been made.

To the extent that GHDL borrows funds specifically for the purpose of obtaining a qualifying asset, GHDL determines the amount of borrowing costs eligible for capitalisation as the actual borrowing costs incurred on that borrowing during the period less any investment income on the temporary investment of those borrowings

Commencement of capitalisation

GHDL begins capitalising borrowing costs as part of the cost of a qualifying asset on the commencement date. The commencement date for capitalisation is the date when the GHDL first meets all of the following conditions:

- it incurs expenditures for the asset;
- it incurs borrowing costs; and
- it undertakes activities that are necessary to prepare the asset for its intended use or sale.

Cessation of capitalisation

GHDL ceases capitalising borrowing costs when substantially all the activities necessary to prepare the qualifying asset for its intended use or sale are complete.

3.7 Financial Instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Classification

The Company classifies its financial instruments as financial assets, financial liabilities and equity instruments.

Financial assets

Financial assets are classified into the following categories: financial assets at fair value through profit or loss, held-to-maturity investments, loans and receivables and available-for sale financial assets.

Financial assets at fair value through profit or loss

A financial asset is classified as fair value through profit or loss if it is classified as held-for-trading or upon initial recognition it is designated by the entity as at fair value through profit or loss.

Held-to-maturity investments

Held-to-maturity investments are non-derivative financial assets with fixed or determinable payments and fixed maturity that entity has the positive intent and ability to hold to maturity.

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed and determinable payments that are not quoted in the active market other than held to maturity investments, available for sale financial assets and loans and receivables.

Available-for-sale financial assets

Available-for-sale financial assets are non-derivative financial assets that are designated as available-for-sale or are not classified in any of the above categories of financial assets.

Financial liabilities

Financial liabilities are classified into the following categories: financial liabilities at fair value through profit or loss and other financial liabilities.

Financial liabilities at fair value through profit or loss

A financial liability is classified as fair value through profit or loss if it is classified as held-for-trading or upon initial recognition it is designated by the entity as at fair value through profit or loss.

Other financial liabilities

Other financial liabilities include bank overdrafts, short-term and long-term loans.

Recognition of financial asset and liability

A financial asset or a financial liability is recognised by GHDL in its statement of financial position when GHDL becomes a party to the contractual provisions of the financial asset or financial liability.

Derecognition of financial asset and liability

A financial asset or financial liability is derecognised; that is, removed, from GHDL's statement of financial position, when GHDL ceases to be a party to the financial instruments contractual provisions.

Initial measurement

Financial instruments is measured at the fair value of the consideration given or received (ie cost) plus (in most cases) transaction costs that are directly attributable to the acquisition or issue of the financial instrument. The exception to this rule is where a financial instrument is at fair value through profit or loss. In this case transaction costs are immediately recognised in profit or loss.

Transaction costs

Transaction costs are defined as the incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or liability. Transaction costs should be added to the initial fair value except for financial assets and financial liabilities classified as at fair value through profit or loss where they should be recognised in profit or loss. For financial liabilities, directly related costs of issuing debt is deducted from the amount of debt initially recognised.

Subsequent measurement of financial assets

After initial recognition loans and receivables and held-to-maturity (HTM) investments should be remeasured at amortised cost using the effective interest method. Certain investments in equity instruments should be measured at cost. These are equity investments that do not have a quoted market price in an active market and whose fair value cannot be reliably measured. All other financial assets should be remeasured to fair value, without any deduction for transaction costs that may be incurred on sale or other disposal. Gains and losses on remeasurement should be recognised as follows:

- Changes in the carrying amount of financial assets at fair value through profit or loss should be recognised in profit or loss.

- Changes in the carrying amount of loans and receivables and HTM investments should be recognised in profit or loss. Changes arise when these financial assets are derecognised or impaired and through the amortisation process.
- In respect of available for sale financial assets:
 - Impairment losses and foreign exchange differences should be recognised in profit or loss.
 - Interest on an interest-bearing asset should be calculated using the effective interest method and recognised in profit or loss.
 - All other gains and losses should be recognised in other comprehensive income and held in a separate component in equity. On derecognition, either through sale or impairment, gains and losses previously recognised in other comprehensive income should be reclassified to profit or loss, becoming part of the gain or loss on derecognition.

Subsequent measurement of financial liabilities

Financial liabilities at fair value through profit or loss should be remeasured at fair value, excluding disposal costs, and any change in fair value should be recognised in profit or loss. All other financial liabilities should be remeasured at amortised cost using the effective interest method. Where a liability is carried at amortised cost, a gain or loss is recognised in profit or loss when the financial liability is derecognised or through the amortisation process.

Impairment

At each September end, an entity should assess whether there is any objective evidence that a financial asset or group of assets is impaired. Where there is objective evidence of impairment, the entity should determine the amount of any impairment loss.

Financial assets at fair value through profit or loss

No special impairment tests need to be carried out for such assets, because they are measured at fair value and all changes in fair value are recognised in profit or loss.

Financial assets carried at amortised cost

The impairment loss is the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses which have not been incurred) discounted at the financial instrument's original effective interest rate. Note that it is the original rate of interest which is used. Using market rates current at the time of the impairment would result in a fair value approach being adopted for the measurement of financial assets carried at amortised cost. The amount of the loss should be recognised in profit or loss.

Financial assets carried at cost

The impairment loss on unquoted equity instruments carried at cost is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the current market rate of return for a similar financial instrument. Such impairment losses should not be reversed.

Available-for-sale financial assets

Because available-for-sale financial assets are carried at fair value with gains and losses recognised in other comprehensive income, short-term falls in fair value will result in debits to other comprehensive income and potentially a debit balance held in equity in respect of an individual asset. If the asset is subsequently determined to be impaired, the loss previously recognised in other comprehensive income should be reclassified to profit or loss, even though the asset has not been derecognised. The impairment loss to be reclassified is the difference between the acquisition cost (net of any principal repayment and amortisation) and current fair value, less any impairment loss on that asset previously recognised in profit

or loss. Impairment losses relating to such equity instruments should not be reversed. Impairment losses relating to such debt instruments should be reversed through profit or loss if, in a later period, the fair value of the instrument increases and the increase can be objectively related to an event occurring after the loss was recognised.

3.8 Inventories

Measurement

Inventories are measured at the lower of cost and net realizable value.

Cost of inventories

The cost of inventories are comprise all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

Cost formulas

The cost of inventories is assigned by using the first-in, first-out (FIFO) cost formula. GHAIL shall use the same cost formula for all inventories having a similar nature and use to the entity.

The FIFO formula assumes that the items of inventory that were purchased or produced first are sold first, and consequently the items remaining in inventory at the end of the period are those most recently purchased or produced.

Recognition as an expense

When inventories are sold, the carrying amount of those inventories is recognised as an expense in the period in which the related revenue is recognised. The amount of any write-down of inventories to net realisable value and all losses of inventories is recognised as an expense in the period the write-down or loss occurs. The amount of any reversal of any write-down of inventories, arising from an increase in net realisable value, is recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

3.9 Trade and Other Receivables

Trade and other receivables are stated at their estimated realisable amounts inclusive of provisions for bad and doubtful debts

3.10 Cash and Cash Equivalents

Cash and cash equivalents consists of cash in hand and with banks on current deposit accounts and short term investments (FDR for the period of 1 to 3 months) which are held and available for use by the Group without any restriction. There is insignificant risk of change in value of the same.

3.11 Calculation of Recoverable Amount

The recoverable amount of an asset or cash-generating unit is the greater of its value in use and its fair value, less cost to sell. In assessing value in use, estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. A cash-generating unit is the smallest identifiable asset group that generates cash flows that are largely independent from other assets and groups.

3.12 Provisions, accruals and contingencies

Recognition

Provisions

A provision is recognised when:

- GHDL has a present obligation (legal or constructive) as a result of a past event;
- it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation; and
- a reliable estimate can be made of the amount of the obligation.

If these conditions are not met, no provision is recognised.

Accruals

Accruals are liabilities to pay for goods or services that have been received or supplied but have not been paid, invoiced or formally agreed with the supplier, including amount due to employees.

Contingent Liabilities

GHDL does not recognise a contingent liability. A contingent liability is disclosed, unless the possibility of an outflow of resources embodying economic benefits is remote.

Contingent Asset

GHDL does not recognise a contingent asset. Contingent assets usually arise from unplanned or other unexpected events that give rise to the possibility of an inflow of economic benefits to GHDL.

Measurement

The amount recognised as a provision is the best estimate of the expenditure required to settle the present obligation at the end of the reporting period.

Changes in provisions

Provisions is reviewed at the end of each reporting period and adjusted to reflect the current best estimate. If it is no longer probable that an outflow of resources embodying economic benefits will be required to settle the obligation, the provision is reversed.

Use of provisions

A provision is used only for expenditures for which the provision was originally recognised. Only expenditures that relate to the original provision are set against it. Setting expenditures against a provision that was originally recognised for another purpose would conceal the impact of two different events.

Future operating losses

Provisions are not recognised for future operating losses. Future operating losses do not meet the definition of a liability and the general recognition criteria set out for provisions.

3.13 Events Occurring after the Reporting Period

All material events after the statement of financial position date have been considered where appropriate; either adjustments have been made or adequately disclosed in the note no. 33.11 of Financial Statements.

3.14 Earnings per Share (EPS)

Measurement

Basic EPS

GHDL calculates basic earnings per share amounts for profit or loss attributable to ordinary equity holders of the parent entity.

Basic earnings per share is calculated by dividing profit or loss attributable to ordinary equity holders of the parent entity (the numerator) by the weighted average number of ordinary shares outstanding (the denominator) during the period.

3.15 Income Statements

For the purpose of presentation of Income Statement, the function of expenses method is adopted, as it represents fairly the elements of the Company's performance

3.16 Revenue

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured, regardless of when the payment is being made. Revenue is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms of payment and excluding taxes or duty.

The specific recognition criteria described below must also be met before revenue is recognized.

Income from sales

Revenue from the local sale of goods is recognised when the significant risks and rewards of ownership of the goods have passed to the buyer, usually on delivery of the goods.

Interest and other income

Interest and other income are recognised on accrual basis.

3.17 Expenses

All expenditure incurred in the running of the business and in maintaining the Property, Plant & Equipment in a state of efficiency is charged to revenue in arriving at the profit/(loss) for the September.

3.18 Finance Income and Expenses

Finance income comprises interest income on funds invested. Interest income is recognised as it accrues in profit or loss.

Finance costs comprise interest expense on borrowings, unwinding of the discount on provisions, changes in the fair value of financial assets at fair value through profit or loss, and losses on hedging instruments that are recognised in profit or loss. Borrowing costs that are not directly attributable to the acquisition, construction or production of a qualifying asset are recognised in profit or loss using the effective interest method.

The interest expense component of finance lease payments is allocated to each period during the lease term so as to produce a constant periodic rate of interest on the remaining balance of the liability.

3.19 Workers' Profit Participation Fund (WPPF)

The Company provides applicable rate of its profit before Tax after charging contribution to WPPF in accordance with the Bangladesh Labour Act, 2006.

3.20 Taxation

The tax expense for the period comprises current tax and deferred tax. Tax is recognized in the income statement, except in the case it relates to items recognized in other comprehensive income or directly in equity. In this case, the tax is also recognized in other comprehensive income or directly in equity.

Current tax

The current income tax charge is calculated based on tax laws enacted or substantively enacted at the balance sheet date. Management periodically evaluates positions taken in tax returns with respect to

situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

Deferred tax

Principle of recognition

Deferred tax is recognised as income or an expense amount within the tax charge, and included in the net profit or loss for the period.

Exceptions to recognition in profit or loss

Deferred tax relating to items dealt with as other comprehensive income (such as a revaluation) is recognised as tax relating to other comprehensive income within the statement of profit or loss and other comprehensive income.

Deferred tax relating to items dealt with directly in equity (such as the correction of an error or retrospective application of a change in accounting policy) is recognised directly in equity.

Deferred tax resulting from a business combination is included in the initial cost of goodwill.

Taxable temporary difference

A deferred tax liability is recognised for all taxable differences, except to the extent that the deferred tax liability arises from:

- the initial recognition of goodwill; or
- the initial recognition of an asset or liability in a transaction which is not a business combination; and at the time of the transaction, affects neither accounting profit nor taxable profit (tax loss).

Revaluations to fair value – property, plant and equipment

The revaluation does not affect taxable profits in the period of revaluation and consequently, the tax base of the asset is not adjusted. Hence a temporary difference arises. This is provided for in full based on the difference between carrying amount and tax base. An upward revaluation is therefore give rise to a deferred tax liability.

Non-depreciated revalued assets

If a deferred tax liability or deferred tax asset arises from a non-depreciable asset measured using the revaluation model in IAS 16, the measurement of the deferred tax liability or deferred tax asset shall reflect the tax consequences of recovering the carrying amount of the non-depreciable asset through sale, regardless of the basis of measuring the carrying amount of that asset. Accordingly, if the tax law specifies a tax rate applicable to the taxable amount derived from the sale of an asset that differs from the tax rate applicable to the taxable amount derived from using an asset, the former rate is applied in measuring the deferred tax liability or asset related to a non-depreciable asset.

Revaluations to fair value – other assets

IFRS permit or require certain other assets to be revalued to fair value, such as certain financial instruments and investment properties. If the revaluation is recognised in profit or loss (eg fair value through profit or loss instruments, investment properties) and the amount is taxable / allowable for tax, then no deferred tax arises as both the carrying value and the tax base are adjusted. However, if the revaluation is recognised as other comprehensive income (eg available-for-sale instruments) and does not therefore impact taxable profits, then the tax base of the asset is not adjusted and deferred tax arises. This deferred tax is also recognised as other comprehensive income.

Deductible temporary difference

A deferred tax asset is recognised for all deductible temporary differences to the extent that it is probable that taxable profit will be available against which the deductible temporary difference can be utilised, unless the deferred tax asset arises from the initial recognition of an asset or liability in a transaction that:

- is not a business combination; and
- at the time of the transaction, affects neither accounting profit nor taxable profit (tax loss).

Unused tax losses and unused tax credits

A deferred tax asset is recognised for the carry forward of unused tax losses and unused tax credits to the extent that it is probable that future taxable profit will be available against which the unused tax losses and unused tax credits can be utilised.

3.21 Statement of Cash Flows

The Statement of Cash Flows has been prepared in accordance with the requirements of IAS 7: Statement of Cash Flows. The cash generating from operating activities has been reported using the Direct Method as prescribed by the Securities and Exchange Rules, 1987 and as the benchmark treatment of IAS 7 whereby major classes of gross cash receipts and gross cash payments from operating activities are disclosed.

3.22 Related Party Disclosures

The Company carried out a number of transactions with related parties. The information as required by IAS 24: "Related party Disclosure" has been disclosed in a separate notes to the accounts (Note-33.03).

4. Risk Exposure

4.1 Financial risk management

GHDL's activities are exposed to a variety of financial risks. The Company's financial risk management centered upon using various tools and to manage exposure to risk, particularly credit risk, liquidity risk, market risk, currency risk and interest rate risk. Similar to general risk management, financial risk management requires identifying its sources, measuring it, and plans to address them. Taking risk is in the core of the financial business, and operational risk is an inevitable consequence of being in business. GHDL's aim is therefore to achieve an appropriate balance between risk and return and minimize potential adverse effects on GHDL's financial performance.

GHDL's risk management policies are designed to identify and analyze these risks, to set appropriate risk limits and controls, and to monitor the risks and adhere to limits by means of prudent risk management policies and application of reliable and up-to-date information systems. GHDL regularly reviews its risk management policies and systems to reflect changes in products, markets, and emerging best practices.

4.2 Credit risk

Credit risk is the risk that counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The senior management of GHDL carefully manages its exposure to credit risk. Credit exposures arise principally in receivables from customers' existing in GHDL's asset portfolio. The credit risk management and control are controlled through the credit policies of GHDL's which are updated regularly. The company is also exposed to other credit risks arising from balances with banks which are controlled through board approved counterparty limits.

4.3 Liquidity risk

Liquidity risk is defined as the risk that the Company will not be able to settle or meet its obligations on time or at a reasonable price.

The Company's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient cash balances or liquid and marketable assets to meet its liabilities when fall due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation. Typically, management ensures that it has sufficient cash and cash equivalent to meet expected operational expenses, including the servicing of financial obligation through preparation of the cash forecast, prepared based on time line of payment of the financial obligation and accordingly arrange for sufficient liquidity/fund to make the expected payment within due date.

4.4 Market risk

GHDL's exposure to market risk, or, the potential for losses arising from the movement of market prices, is limited. Most of its revenues are coming in form of dividend income from various investment projects, whose revenues are completely contractual with no price or quantity risk. Market risks which can also arise from open positions in interest rate and currency also have minimal bearing on GHDL because interest rate risks are hedged at project level and project revenues are fully indexed without limitation with respect to changes in currency and inflation.

Currency risk

The company is exposed to currency risk on revenues and certain purchase such as machineries, parts and equipment. However the fuel price is a pass through and project companies revenues are fully currency hedged by way of having revenues fully indexed without limitation with respect to change in currency parity.

Interest rate risk

Interest rate risk is the risk that the future cash flows of a financial instrument will fluctuate because of changes in market interest rates. GHDL again has limited exposure to interest rate since it borrows primarily in fixed interest rate, and further, interest rate are fully hedged at project levels too.

4.5 Reporting foreign currency transactions

Initial recognition

A foreign currency transaction is recorded, on initial recognition in the functional currency, by applying to the foreign currency amount the spot exchange rate between the functional currency and the foreign currency at the date of the transaction.

Subsequent measurement

A foreign currency transaction may give rise to assets or liabilities that are denominated in a foreign currency. These assets and liabilities is translated into GHDL's functional currency at each reporting date. However, translation depends on whether the assets or liabilities are monetary or non-monetary items:

Monetary items

Foreign currency monetary items outstanding at the end of the reporting date are translated using the closing rate. The difference between this amount and the previous carrying amount in functional currency is an exchange gain or loss.

Exchange differences arising on the settlement of monetary items or on translating monetary items at rates different from those at which they were translated on initial recognition during the period or in previous financial statements is recognised in profit or loss in the period in which they arise.

Non-monetary items

Non-monetary items carried at historic cost are translated using the exchange rate at the date of the transaction when the asset arose (historical rate). They are not subsequently retranslated in the individual financial statements of GHDL. Non-monetary items carried at fair value are translated using the exchange rate at the date when the fair value was determined. The foreign currency fair value of a non-monetary asset is determined.

When a gain or loss on a non-monetary item is recognised in other comprehensive income, any exchange component of that gain or loss is recognised in other comprehensive income. Conversely, when a gain or loss on a non-monetary item is recognised in profit or loss, any exchange component of that gain or loss is recognised in profit or loss.

Measurement of financial assets

Financial assets can be monetary or non-monetary and may be carried at fair value or amortised cost. Where a financial instrument is denominated in a foreign currency, it is initially recognised at fair value in the foreign currency and translated into the functional currency at spot rate. The fair value of the financial instrument is usually the same fair value of the consideration given in the case of an asset or received in the case of a liability.

At each period end, the foreign currency amount of financial instruments carried at amortised cost is translated into the functional currency using either the closing rate (if it is a monetary item) or the historical rate (if it is a non-monetary item). Financial instruments carried at fair value are translated to the functional currency using the closing spot rate.

Exchange differences

The entire change in the carrying amount of a non-monetary available-for-sale financial asset, including the effect of changes in foreign currency rates, is reported as other comprehensive income at the reporting date.

A change in the carrying amount of monetary available-for-sale financial assets on subsequent measurements is analysed between the foreign exchange component and the fair value movement. The foreign exchange component is recognised in profit or loss and the fair value movement is recognised as other comprehensive income.

The entire change in the carrying amount of financial instruments measured at fair value through profit or loss, including the effect of changes in foreign currency rates, is recognised in profit or loss.

Report To The Shareholders Of Golden Harvest Agro Industries Limited And Its Subsidiary On Compliance On The Corporate Governance Code

[Certificate As Per Condition No. 1(5)(Xxvii)]

We have examined the compliance status to the corporate governance code by **Golden Harvest Agro Industries Limited** and its subsidiary for the year ended on 30 June 2018. This code relates to the notification no. BSEC/CMRRCD/2006-158/207/admin/80 dated 3 June 2018 of the Bangladesh Securities and Exchange Commission.

Such compliance with the corporate governance code is the responsibility of the company and its subsidiary, our examination was limited to the procedures and implementation thereof as adopted by the management in ensuring compliance to the conditions of the corporate governance code.

This is a scrutiny and verification and an independent audit on compliance of the conditions of the corporate governance code as well as the provisions of relevant Bangladesh secretarial standards (BSS) as adopted by institute of chartered secretaries of Bangladesh (ICSB) in so far as those standards are not inconsistent with any condition of this corporate governance code.

We state that, we have obtained all the information and explanations, which we have required, and after due scrutiny and verification thereof, we report that, in our opinion.

- (A) The company and its subsidiary have complied with the conditions of the corporate governance code as stipulated in the above-mentioned corporate governance code issued by the commission;
- (B) The company and its subsidiary have complied with the provisions of the relevant Bangladesh secretarial standards (BSS) as adopted by the institute of chartered secretaries of Bangladesh (ICSB) as required by this;
- (C) Proper books and records have been kept by the company and its subsidiary as required under the companies act, 1994, the securities laws and other relevant laws; and
- (D) The governance of the company and its subsidiary is satisfactory subject to the remarks and observations as reported in the attached corporate governance compliance status.

Annex - 1E: WTP Shed

Sl No.	Description of work	Unit	Quantity	Unit Rate (tk)	Amount in BDT
1	Providing & Marking Layout for earth work in excavation in Foundation accepted by the Engineer.	Sft	800	5	4000.00
2	Earth work in excavation in foundation trenches in all sorts of soil except rocky, gravelly, slushy or organic type.	cft	6400.00	10	64,000.00
3	Existing Earth Filling Work	cft	400.00 100.64 185.20 685.837	6	4,115.02
4	Single layer brick flat soling with 1st class or picked jhama kiln burnt bricks in foundation, filling the interstices tightly with sand of minimum FM 0.50, watering, leveling, dressing, etc. all complete as per instruction of the E-I-C.	sft	800.00 92.60 892.599	65	58,018.91
5	Cement concrete work in foundation with Portland cement, sand (minimum FM 1.80) and 1st class/picked jhama brick chips 20mm down graded (LAA value not exceeding 40), including shuttering, mixing by concrete mixer machine, casting, laying compacting and curing for the requisite period breaking bricks into chips etc. all complete as per direction of the E-I-C. Cylinder crushing strength of	cft	200.00	110	22,000.00

	concrete should not be less than 105kg/cm ² at 28 days of curing (Suggested Mix Proportion 1:3:6). Additional quantity of cement to be added if required to attain the strength at the contractors own cost.				
6	Reinforced cement concrete work in base and wall with Portland cement, sand (minimum FM 1.80) and 20mm down well graded crushed Brick chips , (LAA value not exceeding 30), admixture with proper dodge, including, mixing by concrete mixer machine casting, laying, compacting and curing, for 28 days, breaking stone boulders into chips etc. all complete as per direction of the E-I-C but excluding cost of reinforcement. Cylinder crushing strength of concrete should not be less than 250kg/cm ² at 28 days of curing (suggested mix proportion 1:2:4, w/c max. 0.4). Additional quantity of cement to be added if required to attain the strength at the contractor's own cost.	cft	936.00 1374.17 117.81 119.90 18.87 10.07 34.45 2611.27	350	913,945.55
7	Supplying and fabrication of M.S High strength deformed bar/ Twisted bar reinforcement of required size and length for all types of RCC work including straightening the rod, removing ruts, cleaning, cutting, hooking, bending, binding with supply of 22 B.W.G. GI wire, placing in position, including lapping, spacing an etc. complete including cost of all materials, labour, local handling, laboratory test, incidentals necessary to complete the work as per specifications, drawings and direction of the Engineer. Laboratory test for physical property, strength, elongation% & bend to be performed as per ASTM. (Measurement will be based on standard weight of 490 lbs./ft ³ Chairs, laps and separators will not be measures for payment. The cost of these will be included in the unit rate) High strength deformed bar (grade 60, billet)	kg	18857.00	75	1,414,275.00
8	Minimum 12mm thick cement plaster (1:4) with neat cement finishing in/c washing of sand, finishing the edges and corners and curing for the requisite period etc. all complete as per direction of the E-I-C (Sand minimum FM 1.2).	sft	1223.70 3010.50 351.92 4586.12	40	183,444.80
9	Brick work with 1st class bricks in cement mortar (1:4) and making bond with connected walls in/c necessary scaffolding, raking out joints, cleaning and soaking the bricks at least for 24 hours before use, washing of sand, curing for requisite period, etc. all complete as per direction of the E-I-C for all floors. (Minimum FM of sand:1.2)	cft	114.36 83.00 197.36	195	38,484.69
10	Admixture for RCC work (Anti Corrosive)	litter	350	165	57,750.00
	Total =				2,760,033.98

Annex - 2F: Dough Mixer

SI No	Description of Items	Unit	Qty.	Rate	Amount in BDT
1	SPIRAL MIXER	Pcs	2	800,000	1,600,000
	Dough Capacity: 160 Kg Max. Flour Capacity : 100 Kg Brand Name: ALTUNTOP Country of Origin: Turkey				
2	DOUGH MOULDER	Pcs	2	400,000	800,000
	Belt width:40 CM, 4 Cylinder Capacity: 1500 pcs/h Brand Name: ALTUNTOP Country of Origin: Turkey				
Total -					2,400,000

Annex - 2G: Rotary Oven

SI No	Description of Items	Unit	Qty	Rate	Amount in BDT
1	Gas Rotary Oven	Pcs	1	2,000,000	2,000,000
	Oven-64 Trays Tray Size: 400MM*600MM Country of Origin: China				
Total -					2,000,000

Annex - 2H: Oil Reserve Tank

SL No	Description of Items	Unit	Qty	Rate	Amount in BDT
1	SS Tank		1	1,400,000	1,400,000
	Capacity: 10,000 Liters				
	Model: SS304A Food Grad				
	Thickness: 6mm				
	Domination: Standard Size				
	Tank top side one manhole & inside roof which is use for tank cleaning				
2	SS Tank		2	500,000	1,000,000
	Capacity: 2,000 Liters				
	Model: SS304B Food Grad				
	Thickness: 5mm				
	Domination: Standard Size				
	Working Line: Two working line oil incoming & out going				
3	MS Tank		1	100,000	100,000
	Capacity: 3,000 Liters				
	Model: SS004 Food Grad				
	Thickness: 8mm				
	Domination: Standard Size				
	Working Line: Two working line oil incoming & out going				
Total -			4		2,500,000

Annex - 2I: Pallet

SL No	Description of Items	Unit	Qty	Rate	Amount in BDT
1	Industrial Pallet	Pcs	5,830	130	757,900
	L-1200XW1000XH-16mm, Static Load 5 ton				
Total -					757,900

Annex - 2 J: Date Coding Machine

SL No	Description of Items	Unit	Qty	Rate	Amount in BDT
1	Markem-Image Thermal Transfer Over Printer	Set	4	400,000	1,600,000
	Model: 8018i (10018817) Complete with standard accessories				
Total -					1,600,000

Annex - 2K: Auto Sealer Machine

SL No	Description of Items	Unit	Qty	Rate	Amount in BDT
1	Auto Sealer machine Mechanical	Set	4	25,000	100,000
Total -					100,000

Annex - 2L: Metal Detector Machine

SL No	Description of Items	Unit	Qty	Rate	Amount in BDT
1	Metal Detector Machine	Set	2	579,491	1,158,981
	Model YD3-150CD Made in Japan				
Total -					1,158,981

Annex - 2M: Freezer

SL No	Description of Items	Unit	Qty	Rate	Amount in BDT
1	GLASS TOP FREEZER	Pcs	1700	35,500	60,350,000
	Brand: Super Ariston CAPACITY:-300 LTR Model: TDF-29				
2	GLASS TOP FREEZER	Pcs	450	32,500	14,625,000
	Brand: Caravell CAPACITY:- 235 Ltr Model: SD-235				
3	CURVE GLASS CHEST FREEZER	Pcs	350	37,000	12,950,000
	Brand: AUCMA CAPACITY:- 282 Ltr Model: SD-276				
4	Glass Top Freezer	Pcs	300	29,500	8,850,000
	Brand: Super Ariston CAPACITY:- 250 Ltr Model: TDF-26G				
5	Store Freezer	Pcs	300	80,500	24,150,000

	Brand: Super Ariston CAPACITY:- 770 Ltr Model: SD-75DD				
6	Sliding Glass Door Freezer	Pcs	350	26,000	9,100,000
	Brand: Super Ariston CAPACITY:- 185 Ltr Model: SD-75DD				
Total -			3450		130,025,000

Annex – 2N: LPG Line

SI No.	Description of Items	Unit	QTY	Rate	Amount In BDT

Underwriters' Obligation

If and to the extent that the shares offered to the existing shareholders by the Rights Share Offer Document authorized hereunder shall not have been subscribed and paid for in cash in full by the closing date, the Company shall within **10 (ten)** days of the closure of subscription call upon the underwriters (**for full unsubscribed amount**) in writing with a copy of said writing to the Securities and Exchange Commission, to subscribe for shares not subscribed by the closing date and to pay for in cash in full, inclusive of any premium if applicable, for such unsubscribed shares within **15 (fifteen)** days after being called upon to do so. If payment is made by Cheque/Company Draft by the underwriter it will be deemed that the underwriter has not fulfilled his obligation towards his commitment under this Agreement, until such time as the Cheque/Company Draft has been encashed and the Company's account has been credited. In any case, within **7 (seven)** days after the expiry of the aforesaid **15 (fifteen)** days, the Company shall send proof of subscription and payment by the underwriters, to the Commission.

PARTICULARS ALONG WITH THE TERMS AND CONDITIONS OF THE MATERIAL CONTRACTS INCLUDING VENDORS' AGREEMENT, UNDERWRITING AGREEMENT, ISSUE MANAGEMENT AGREEMENT, AGREEMENT WITH THE BANKER TO THE ISSUE AND CONTRACT FOR ACQUISITION OF PROPERTY, PLANT AND EQUIPMENT [see rule-8(p)]

Terms and Conditions of the Rights Issue

Basis of the Offer

The Company records its share register of members on **October 30, 2019** for determining the shareholders who are eligible to receive this offer of shares on rights basis. The ordinary shares are now being offered on a rights basis to the shareholders holding shares on the record date at Tk.10.00 each, in the ratio of 03[R]:04, i.e. 03 (Three) right shares for every 04 (Four) existing shares held on the record date.

Entitlement

As a shareholder of the Company on the record date on **October 30, 2019** the shareholders are entitled to this Rights Offer. Only the holder(s) of a minimum of one fully paid ordinary share is entitled to receive the Rights Offer.

Acceptance of the Offer

A shareholder may accept and apply for the shares hereby offered, wholly or in part by filling in Application - Form A and submitting the same along with the application money to the Bankers to the Issue on or before the Closing Date of subscription of **December 30, 2019**.

Renunciation

A shareholder may renounce all or part of the shares he/she is entitled to in favour of any other person(s) other than an infant or person of unsound mind. He/she can renounce his/her rights/entitlement of shares by signing Renunciation Form-B. Renouncee(s) shall fill in Form-C appropriately.

General

All applications should be made on the printed form provided by the Company in this Rights Share Offer Documents only and should be completed in all respects. Applications which are not completed in all respects or are made otherwise than as herein provided or are not accompanied by the proper application amount of deposit are liable to be rejected and the application money received in respect thereof shall be refunded.

All communications in connection with the application for the Rights Share should be addressed to the Company quoting the registered folio number/BO ID number in the form.

Condition of Subscription

Rights Offer of **89,932,342** Ordinary Shares of Tk.10.00 each at an issue price of Tk.10.00 per share, totaling **Tk. 899,323,420** offered on the basis of **03[R]:04**, i.e. 03 (three) rights shares for every 04 (four) existing share held by the Shareholder(s) whose name(s) appeared in the Company's Share Register at the record date as on **October 30, 2019**.

Payment of Share Price

Payments for the full value of Shares applied for shall be made with designated Branches of Bankers to the Issue by Cash/Pay Order/Demand Draft payable to "**Golden Harvest Agro Industries Ltd.**" and crossed. The Pay Order/Demand Draft for payment of share price must be drawn on a Company in the same town to which the application form has been submitted. It is to be noted that all transactions above Tk.1.00 lac must be effected through Demand Draft/Crossed Cheque/Pay Orders.

SUBSCRIPTION STATUS	
Opens on	Closes on
December 08, 2019	December 30, 2019
Within banking hours both days inclusive	

Any changes or extension regarding subscription period will be notified through national dailies.

Lock-in on Rights Share

The Rights Shares of Directors and other shareholders holding 5% or more shares shall be subject to lock-in for a period of three years from the date of closure of the rights share subscription. In the event of renunciation of rights shares by aforesaid persons, the renounced shares shall also be subject to lock-in for the same period shall be operative.

Others

The application not properly filled in shall be treated as cancelled and deposited money will be refunded. For any reason, no profit/compensation will be paid on the refunded amount.

The offer will be deemed to have been declined if completed Application Form-A with necessary payments have not been received by **December 30, 2019** or by such later date as may be notified through national dailies to that effect.

Material Contracts

Bankers to the Issue:

Standard Bank Limited, Investment Corporation of Bangladesh (ICB), First Security Islami Bank Limited and United Commercial Bank Limited has accorded their consent to act as the Banker to the Issue and will collect the subscriptions money of the Rights Offer in cash/cheque/pay order/draft etc. through their designated branches as mentioned.

Significant clauses of Bankers to the Issue agreement are as follows:

- ✎ The Company shall issue **89,932,342** Rights shares of Tk.10.00 each at an issue price of Tk.10.00 each per share, totaling Tk. **899,323,420** in accordance with the consent of the Bangladesh Securities & Exchange Commission (BSEC) and relevant Securities and Exchange Commission (Rights Issue) Rules, 2006.
- ✎ The company shall pay commission to the Bank at the rate of 0.10% of the amount of subscription money to be collected.
- ✎ The company shall comply with any other formalities required under law of regulatory bodies for raising fund publicly.

The rights issue subscriptions money collected from the shareholders by the Bankers to the issue will be remitted to the Company's **A/C No. 01736000303** with **Standard Bank Limited, Panthapath Branch**.

LETTER OF OFFER FOR RIGHTS ISSUE

Dear Shareholder (s)

We are pleased to inform you that the Board of Directors in its meeting recommended to issue **89,932,342** Ordinary Shares as rights shares of **Tk.10.00** each at an issue price of Tk.10.00 per share on the basis of **03[R]:04** i.e. 03 (three) Rights Shares for every 04 (four) existing share held, which was approved by the Shareholders in the Extraordinary General Meeting (EGM) held on May 26, 2019. As a registered Shareholder as on **October 30, 2019** (Record date for entitlement), you are entitled to subscribe your rights share.

If you wish to accept the above Rights Share in full or in part, you are required to submit completed Application Form-A annexed hereto with necessary payments. You may, however, renounce your rights in respect of all or part of your entitlement in favor of others in which case the Renunciation Form-B and Form-C annexed here to be submitted duly filled in by you and the renouncee(s) along with necessary payments.

The rights cannot be exercised for fraction of a share i.e. below full unit of share.

All the payments for accepted shares are to be made in cash or by P.O/DD/Cheque @ **Tk.10.00** each at par and to be deposited with any of the Branches of Bankers to the Issue during Companying hours from **December 08, 2019** to **December 30, 2019** (both days inclusive). Any extension of time will be notified through national dailies. Payments through P.O/DD/Cheque, must be payable to "**Golden Harvest Agro Industries Ltd**" and must be drawn on a Company in the same town where the Branch of Bankers to the Issue in which the application form has been submitted is situated. It is to be noted that all transactions above **Tk.1.00** lac must be effected through Demand Draft/Crossed Cheque/Pay Orders.

The offer will be deemed to have been declined if completed Application **Form-A** and/or Renunciation **Form-B** and **Form-C** with necessary payments have not been received by **December 30, 2019** or by such later date as may be notified through national dailies to that effect.

A self-explanatory Rights Share Offer Documents is attached for your kind information and evaluation.

By order of the Board

Sd/-

Ahmed Rajeeb Samdani
